Hello,Name here is Bob..KB2FUT,I have a Icom 475H that is for sale.
Very little usage,on a scale of 1-10,I'd give it a 8.5,small scraches on
top and
one(1) of the display lites has dimmed out(right side),but you can see
diplay Ok.
Checked out radio power 80 watts with Bird meter and dummyload.Let me
know if
your intrested,I'm putting it on e-bay this week.Thanks....Bob

FOR SALE:
HAND-CRANKED MAGNETO GENERATORS
Produces 120V AC.
These will provide up to about 20 Watts depending on
your cranking speed! The size is about 3" diameter and
3" deep with a retracting handle. Fluke freq meter shows around 20 Hz
on one pair of terminals and around 60 Hz on another.
You can mount these behind a sturdy front panel with a single
hole and the large nut provided.
Will sell for $25.00 each plus $6.50 USA shipping

Color may vary from the style shown here:

http://home.cfl.rr.com/happysurfer/imag/h.jpg

All:

I normally do not endorse swap sites or "swap boards" but, recently, I accidently found one that is very well designed and easy to use. I believe it is worth a look. Just click on www.hamswap.com.

I do not think you will be disappointed, especially when people start placing more ads on the site.

John, you're too kind! What's the owner of this site trying to do, drive us
all nuts?
I grade it: Concept: A, and Implementation; F-.
I'd like to find other sites where I can sell off some of my computers,
"high speed" and "exotic" packet stuff. Anyone got some good ones???

Herb.

I agree, good companies do their testing before release.

There is the modern saying "Never buy version 1.0", or as they say in
the old country, caveat emptor.

Happy trails,
Gary

I just used the site without any problems. Even posted my eternal FT101F manual
request on it!

Ends Apr-28-01 10:49:26 PDT

You are bidding on a Kenwood TH-215A VHF FM handheld transceiver with optional SMC-30 speaker/mic. Included with the handheld are: PB-2 (8.4 volt, 500 mAh battery pack); wall charger; SMC-30 speaker/microphone; rubber antenna; and the original instruction manual. I have used the radio and it works perfectly. The battery pack holds a charge well and has good life. The radio is in excellent condition (9.5 of 10). The only flaws are a few scratches on the back panel. The radio has a receive range of 141.000 MHz to 162.995 MHz. The transmit range is 144.000 MHz to 147.995 MHz. I believe it can be modified for MARS/CAP. The radio has 10 memories (is capable of working odd splits), 38 tone PL encode, 3 types of scan (band, memory, and programmable limit), 3 scan modes (seek, time, and carrier), adjustable battery saver mode, lighted display, priority watch feature, key lock mode, TX disable mode, DTMF pad, reverse feature, and can be powered directly by 7.2-16 volts DC via a jack on top of the radio. The transmit power is approximately 5 watts when powered by 13.8 volts DC and approximately 2.5 watts when powered with the battery pack that is included. It has a low power setting of approximately one half watt. The deviation has been measured at 3.78 KHz. The receive sensitivity has been measured at .15uv 12 db Sinad. I have replaced the lithium memory backup battery, so it should be good for another 5+ years. The radio is missing the belt clip. I am selling the radio to free up money for a two meter all-mode rig I purchased. Buyer to pay actual shipping charges from 65781 (no "handling", packing charges etc). I will pack the radio securely and guarantee it is working when it leaves here. If the buyer wants insurance on the shipment, it will be at their option and expense. I will ship it by USPS unless the buyer prefers other means. I reserve the right to relist the item if ebay is down during

the last 5 hours of the auction. I have tried to be very complete in this description, but if you have questions, please email.

I have played with both and went with the TS. I had the 746 and the 847.
The DSP on the 756 sounds so crummy to me. I didnt like it at all. The
scope is neat but i wont use it its called turn the vfo for me. And I like
the versitility of the 2000 the upgrades for it will be via Firmware /
uploads via computer. Why do I need to buy a new rig just buy the upgraded
firmware. Why hasnt the big 3 come up with this 10 years ago? Who knows. Ten
Tec does it the with the Jupiter. For me the choice is hands down the TS
for its many options and for not having to buy filters. Its a good rig. And
I can assure you I will get my DXCC with this one.

 Given some of the previous posts about the emissions from this rig,
have you had any problems or reports from local hams, or neighbours with
TVI etc ?

 Regards,

 Howard. M0HAD

Hi Howard,

IMD does NOT cause TVI, it causes splatter on adjacent frequencies.
Since splatter is masked by stronger signals or noise, it is best
tested in a controlled environement. That's why the tests are so
important.

We have gradually been accepting poorer and poorer rigs for use.
Keyclicks and splatter are on the way UP, that is definite.

The TS-2000 is a large step towards more deterioration in spectral
purity of our rigs. Personally, I hope they never become popular or
they are corrected and at least brought back to the same specs as most
other radios.

We may never return to the spectral purity of something like a Collins
KWM-2 (we are now about 15-20 dB worse than that in the typical rig),
but there is no reason to accept constantly declining transmitter
close-spaced performance. The TS-2000 is another 15 dB in the wrong
direction.

I can get better IMD performance from a class C amplifier, so I have
to wonder what engineering mistakes they made.

Since I live in a quiet rural location, and work weak signals, this
problem is very evident to me. It may not be evident in other
situations, that's why testing is important. The numbers don't lie,
and the TS-2000 is the worse radio to hit the market in a long time.

Shame on them for ignoring IMD performace.

73 Tom

I have a Swan 500cx HF rig in good condition. I would say an 8 out of a 10.
All knobs are there, all the screen printing is intact, all the lights
light, it all looks good. The radio is just the radio, there is no mic or
key. Also have the matched Swan 117xc power supply and speaker. All power
and speaker cables are included and in good shape. The radio has little
sign of use. Powers up good, and receives good. I have not tested the
transmit, but I know it does transmit. Would be a great matched set for an
HF station, esecially for someone who likes older rigs or someone who
doesn't want to spend a fortune on a newer rig.

If interested e-mail me for more information.

Thanks, Justin Moon KE4CAA

Tom your nuts that thing has TX bandwidths of 2.4 to 3.0khz. Seems to me you
are just one of many that like to rip ass on new rigs out. But whatever. I
am happy with my rig and thats all that counts. See you on the DXCC list.
And as for collins i dont want the over priced drifting equipment in my
shack. I will stick with my crummy IMD rigs any day and guess what I will
stay or beat you any day on what I have here next to the collins. I have to
admit the audio is nice sounding on those tanks.

Don't get so emotional. It's just your radio, not your sister. And leave my nuts out of this!

>But whatever. I
>am happy with my rig and thats all that counts. See you on the DXCC list.
>And as for collins i dont want the over priced drifting equipment in my

In testing the TS-2000 has the higest transmitter IMD of any radio on the market today, by a large margin.

Anyone who understands IMD would know that it doesn't mean the audio "sounds bad". All it means in this case is the spurious garbage outside the required bandwidth of the transmitter is maybe 40 times higher than that from other rigs.

We need cleaner radios, not dirtier ones.

With attitudes like yours it's no wonder radios click and splatter more than they used to. The manufacturers don't need to worry because people will accept deteriorating performance with question.

It isn't MY fault they have a poor design. Don't blame it on me!

73 Tom

Possibly more proof that Kenwood is courting the CB crowd? (They could care
less about IMD - even if they knew what it was)

I suspect it is more proof that engineers know less or care less about
what acceptable performance is, rather than intentional.

You can see examples of this creeping into the CW sections of rigs,
where they call the ratio control "weight" and provide no means of
adjusting the weight...which people commonly want to adjust....and
instead change the ratio of dot-to-dash which no one in their right
mind wants to change.

Same think with keying waveforms... and more important bandwidth of CW
transmitters.

They must have customers who buy a radio without knowing or caring if
it really doesn't work as well as it should, or doesn't have needed
features. I'm sure the manufacturers don't get enough constructive

feedback demanding they clean up transmitters and receivers and add useful features like a weight control for CW.

When I told a certain manufacturer their top-of-the-line radio had leading edge overshoot to 300 watts on key closure (even when power was set to 50 watts!) and had no weight control their marketing guy responded "no one cares, no one works CW anyway..and all radios have power overshoot".

Personally, I want to buy the cleanest radio I can. I worry about blocking and IMD performance, and how it might bother other people, more than I worry about 10,000 stacked memories or extended double DSP.

73 Tom

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Asking $695 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$770 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

The ONLY trade I'll consider is for a "like new" 706MkIIG. Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

Hi, All, just thought I would give my 2 cents, I'm not a ham myself, but I
am enjoying this thread. #1 I'm sure that the equipment in question was Type
Accepted by the FCC before it was manufactured or imported, # 2 sounds like
you guy's have two choices, 1. Get all hams together and create a Superfund

to pay for a Ham Enforcement Agency division in the FCC (We are talking $$$$$$$$) or 2. do the best you can with self policing of the bands and report any and all infractions to the FCC, and hope that they are heard. But to go after the manufacturer's and this one guy trying to make a dollar on a web site is silly. Lets talk about Mass Marketing, Radio Shack. no more needs to be said about that.

Mike

 Hewlett Packard 4260A Universal Bridge -- measures resistors, capacitors
and inductors. Also checks inductor Q and capacitor D using either
internal 1KC source or external oscillator.   Has "semi-auto" nulling
feature in L&C modes. 6" hi x 8" wide x 12" deep overall -- 115/230 VAC
powered. Cosmetically very good. $300

All of the above plus shipping, if necessary, naturally.

********** Knobs **********

These are all used, most have set screws, with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Dakaware
    1-1/16" Knurled Knob -- $4
     1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line -- $7ea
     1-1/16" Knurled Knob w/ 2" skirt marked 0-10 -- $10
     1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line -- $10
     2-3/8" Knurled Knob w/ white vinyl pointer at skirt level -- $15 ea
     2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line -- $15
     2-1/16" skirt only -- $5

   Short (1-3/16")pointer knob w/ white indicator line $2 ea
   Long (2") pointer knob w/ white indicator line $3

Harry Davies
   #1206 1-3/8" knobs -- $5 ea
   Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- $1 ea

Hewlett Packard (70's vintage)1-5/8" spinner knob w/ 3/8" bushing -- $10

Kurz-Kasch
   #308 1-1/8" knob -- $5
   #308 1-1/8" knob w/ 1-3/4" brite metal skirt with 100 graduations and tens indicated in black -- $10
   #309 1-5/8" knob w/ metal spinner and 2-1/4" black metal skirt with 100 graduations and tens indicated in white -- $15
   #309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal skirt with 100 graduations and tens indicated -- $15

   #310 2-3/8" knob -- hub drilled out to 3/8" -- $10
   #310 2-3/8" knob w/metal spinner shaft -- $15 ea
   #311 2-1/16" skirted knob (some of the white lines are need refilling on these) -- $10 ea
   #380 1.5" skirted knob -- $7

       These look like what was on some '60's Hammarlund, Eico & Knight Kit stuff
   #642 1.5" skirted knob -- $7
   #647 1"   skirted knob w/indictor line -- $7 ea
   #653 1.5" skirted knob w/indictor line -- $7 ea

Millen? (has a logo that looks like a "M" with an "I" superimposed at the center) #309 3-1/2" Handwheel style knobs as seen on the SX-28, if I recall correctly.
    These are all in need of minor plastic surgery -- two have chips out the skirt where the set screw goes and one has had it's center drilled through... perhaps, to make a concentric assembly??
$10 ea.

National HRT 2-1/16" diameter
      Black, trim rings somewhat tarnished -- $5 ea
      Gray, trim ring shiny like new -- $10

There are also many knobs from 1960's Tektronix and Hewlett Packard
oscilloscopes, if anyone has any need, please inquire.

All of the above plus shipping, if necessary, naturally.

********** Electrolytic Capacitors **********

These are mostly NOS & range from 10-30 years old. I have between 2-6 ea of many of these parts.

Axial Leaded

210uF@35V -- $.50
250uF@40V -- $.50
500uF@50V -- $1
500uF@75V -- $2
750uF@50V -- $2
1000uF@50V -- $2
1000uF@75V -- $3
2000uF@50V -- $3
2200uF@35V -- $2
2700uF@30V -- $2
4700uF@25V -- $3
4700uF@35V -- $4
6800uF@15V -- $2
8000uF@20V -- $3

80uF@175V -- $1
120uF@250V -- $2
200uF@250V -- $3
40uF@450V -- $4
80uF@450V -- $5
10uF@475V -- $1

Radial Style

1000uF@20V (used) 4/$1
2200uF@25V -- $1ea
2200uF@35V -- $1.50ea

1000uF@200V (used) -- $2
2000uF@200V -- $3
330uF@400V -- $3

560uF@250V / 47uF@250V -- $4

Old Can Style (Approx 1.5" diameter) mostly NOS Sprague & Mallory

Multi-Section Units -- $7 ea
150uF@175V / 150uF@175V
300uF@175V / 250uF@175V
100uF@250V / 100uF@250V / 600uF@100V
250uF@200V / 400uF@175V / 50uF@175V / 5@175V
200uF@300V / 100uF@175V / 30uF@150V
200uF@300V / 100uF@300V
100uF@350V / 100uF@50V
120uF@350V / 80uF@350V / 20uF@350V

150uF@400V / 10uF@400V / 15uF@400V
40uF@450V / 40uF@450V
80uF@450V / 2uF@350V
10uF@475V / 18uF@475V / 40uF@25V
10uF@475V / 10uF@475V / 10uF@475V / 10uF@475V (used)

Multi-Section Units -- $4 ea
500uF@25V / 50@25V
500uF@50V / 500uF@15V
500uF@50V / 50uF@25V
800uF@35V / 800uF@35V
2000uF@20V / 4000uF@20V
750uF@50V / 500uF@40V / 500uF@40V

Single Section Units -- $3 ea

********** Power Resistors **********
200W (or so -- 10" long) 1500 ohm 10 tap (every 150 ohms) power resistors --
used good, $10 ea

Eight Ohmite 3K, 225 Watt power resistors mounted to a 15" x 16" fiberglass
(PCB material) panel. Currently wired in parallel but, easily reconfigured.
  $50

Ten Ohmite 2K, 225 Watt power resistors mounted to a 15" x 18" fiberglass (PCB
material) panel. $60

10 Meg meter resistor assembly used to measure 10KV with a 1mA meter
movement.
  It consists of 2 large, 10" long, 5 Meg resistors mounted in a nicely
made 12" x7" x 2" plexiglass housing. $10

All of the above plus shipping, if necessary, naturally.

********** Power Supplies **********

Open (L-shaped) frame power supplies with attached 2 wire polarized line cord, 120V 60 Hz AC input. There is a relay that switches the 3 voltage outputs. They measure about 6" x 3" x 2". They have an internal 1A line fuse. They have a six-pin SIL output connector and come with a matching cable to pigtails. The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA.

5 units available. $15 ea.

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General
    Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB 5"x3"x2" -- NOS $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB 5"x4"x2" -- NOS -- $25 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB 5"x4"x1.5" -- NOS $25

Sierracin 5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2" -- used $15 ea (2 available)

All of the above plus shipping, if necessary, naturally.

****** VACUUM CAPACITORS & other Vacuum things **********

Jennings Vacuum Variables -- all used (or at least aged)

UCS-300-15S 300pF 15KV $250 with standard puller, later manufacture (blue)

UCSL-750 750pF 3KV $150 with standard puller
UCSL-1000 1000pF 3KV $150 with standard puller

R1G SPST 20KV 20Amp Vacuum Switch $100

---------Fixed vacuum caps----------

Jennings VC-12 12pF 20KV $25
Jennings 50pF 86KV $86
Western Elec 100pF 5KV $50 (This one hi-pot checked @ 14KV)

--------- Vacuum Relays -----------

 Old "T" style vacuum relays for sale, where the coil slips over one leg
 of the glass enclosed contact assembly -- One of the contacts has a Penta Labs
 part number: 420 53 3875. The coils are 28V. $10 ea

Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum
relay mounted on top of a small (2"x3"x4") metal enclosure. There is a
 15 pin Jones connector on the side of the box. I believe that there are
 some auxiliary contacts in the box in addition to the vacuum relay.
This is also a 28V unit. $15

All of the above plus shipping, if necessary, naturally.

********** SEMICONDUCTORS **********

GE 1N3289 rectifiers, 100A, 200PIV, DO-8 large stud package. These look like
NOS --
(It doesn't appear that the anode leads have ever been bolted to anything.)
4 pieces -- $30 all

GE 4JA61C rectifiers, 50A, 300PIV, large stud package. A pair for $5.

GE 4JA63C rectifiers, 50A, 300PIV, large stud package. Four for $10.

GE A70B, 100A, 200PIV, DO-8 large stud package. Used. Four for $15.

GE C156D, 110A, 400V Inverter SCR's, used. $10ea.

Lambda FBH-24 Hybrid Regulators NOS -- $10 ea

Motorola NOS rectifiers, 50A, 100PIV, plate mounted. 2ea MR1201FL & MR1201FLR (a bridge worth)-- NOS $10

Motorola NOS TIP34A 10A 60V TO-218 PNP Power Transistors. 4/$1

Sarkes-Tarzian Model 78D center-tapped Selenium Rectifiers. NOS! $5ea

Westinghouse 6-1-1B/1N1188 3 Phase 600V 35 Amp rectifier assembly with heatsink. Unused but, tarnished from long storage $10.

Westinghouse NOS, 80A, 1000V house-numbered SCR's $15ea.

Westinghouse NOS, 20A, 1000V house-numbered Rectifiers $4ea.

All of the above plus shipping, if necessary, naturally.

******** Used Coax Connectors *************

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-643 C Female-Female barrel connectors, $3 ea
UG-637 UHF Male to C Female adapters, $5 ea

UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

********* New Coax Connectors ***********

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

  Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
 I believe that they are all for RG-59 size cable.

Kings Electronics (US made in New York, new home state of ex-President
William Jefferson Clinton)

   KC-59-642-M06 BNC Cable Male   -- $1 ea

   KA-59-385-M06 TNC Cable Male   -- $1 ea

   KA-19-43 TNC Bulkhead Female   -- $1 ea

*********   Coax Antenna Relays **********

These all have (3) UHF connectors. They are somewhat old looking on the
outside but,
 I popped the inspection port on each and all the contacts are all happy.
And they all go click upon application of the appropriate voltage.

Dow-Key DK-60 style
   110-115 VAC coil   -- $30

Advance (same style but, heavier contacts & construction)
   115 VAC coil   -- $30

All of the above plus shipping, if necessary, naturally.

********** Homebrew Radio things **********

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Fully populated 2.5" x 5.5" homebrew PCB w/ two 1496 balanced mixers, a couple slug tuned coils, plus a CA3001-- I only see power connections; Don't know what this does! $4

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $5

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $5

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $5

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 440. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x

4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $12

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $12

Active Field Strength Meter -- Schematic per 1985 ARRL Handbook p 39-10. Built in a 5" x 4" x 3" black crackle finish metal case with a Simpson Model 29, 4" meter, covering the entire front of the box. -- $15

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $20

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $30

All of the above plus shipping, if necessary, naturally.

Triplett 327T 10 Volt 3" Square meter NIB -- $20

Westinghouse 3" Square RX-35 series meters $10 each

   15 VDC   20 VAC 35KV (2mA full scale on this last unit)

Westinghouse 2" round 9A RF Ammeters w/ internal thermocouple $15 ea

Weston 507 2" round 3A RF Ammeters w/ internal thermocouple $15 ea

Weston 3" square 1.5A RF Ammeter w/ internal thermocouple $20

Weston 425, 100 mA 3" round RF ammeter w/ internal thermocouple $15
    301 3" 3A RF (requires external thermocouple that I don't have) $7

All of the above plus shipping, if necessary, naturally.

*** Vintage Electronic Manuals (original unless noted) ***

Army / Airforce / Navy
   AN/APS-13 Airborne Radar (1944) $20
   AN/URM25D Signal Gen (partial copy) $10
   BC-314G Receiver (schematic copy only) $3
   BC-344D Receiver (schematic copy only) $3
   SCR-211 A-T plus AA-AL Frequency Meter $25
   SCR-522 A/T2 SCR 542 A/T2
    (cover badly worn -- insides ok) $30
   TM11-825 TWT PB-50A Transmitter (1944) $25
   LM-14 Frequency Indictor (1943) $20
   Hughes HTR-12A/C HTR-13A/C Radar $30
   Hughes Aircraft Unit 24 MA-1,
    F-106A computer maint. manual $30

B&K
   415 Sweep/Marker Generator $15

B&W
   400 Distortion Meter $15
   410 Distortion & Voltmeter (copy) $8

Boontoon
   160-A / 170-A Q Meter (copy) $5

Bytcom
   24/12ADH Modem $5

Central Electronics
   20A SSB Exciter partial manual copy
      plus (original?) schematic $25

Concord Data Systems
   224 Autodial Modem $5

Collins

32S-1 Transmitter $50
70-E8 Oscillator glossy brochure
(1947 copyright) $10
520 5430 00 Vernier Tuning Knob $5

Eico
HFT-90 FM Tuner $10

Federal Telephone and Radio
FT-125-B25A $20

Fluke
8022B DMM $10

General Radio
1606-A Impedance Bridge (copy) $10

Gorler
UT-345 AFC / UT-343 FM Tuner $10

Heathkit
309C RF Probe $5
A-9C Audio Amplifier $15
AG-9 Audio Generator $10
CM-1073 Auto Tune-up Meter $5

FM-3 FM Tuner $10
FM-4 FM Tuner $10

IM-4100 Frequency Counter $10
O-11 Oscilloscope $10

SA2500 Antenna tuner (new) $50

TC-2 Tube Checker $10
V-6 VTVM $8
WA-P2 Preamplifier $10

Hewlett Packard
150A/AR Oscilloscope $10
152 Dual Trace Amplifier $5
400A VTVM $5
400C VTVM $5
400D/H VTVM $10
400D/H/L VTVM $12
410B VTVM $12

3455A Digital Voltmeter (operation) $10
5340A Frequency Counter (comb bound copy) $50
6200A Power supply -- Harrison Lab version
lower right part of front cover missing $15
7035B X-Y Recorder $20

8445A Preselector (bound copy) $20
8556A Spectrum Analyzer LF unit $45
8672A Synthesized Generator $100

10811A/B Quartz Crystal Oscillator $20

Motorola
Motran (136-174 MHz) FM transceiver instructions, schematics 68P81044A10 (2 books) $30

Motran (150.8-174 MHz) FM transceiver instructions, service/schematics 68P81040A45 (2 books) $30

Motran (150.8-174 MHz) FM transceiver service manual (copy) 68P81041A15 $15

Model X53GJV-1091A Two-Way FM Radio (160-174 MHz) service manual (copy) $15

Radio Shack
CT-101 Cell Phone Owners Manual $5
CT-101 Cell Phone Service Manual $20
SA-10 Stereo Amplifier $2

RCA
WR-64B Color Bar Generator(copy) $5
5-E 5KW AM Broadcast Xmtr $50

Sabotronics
2000 DMM $10

Signal One
CX7A (partial copy -- schematics mostly) $10

Teac
MV-550 VCR Service Manual $20
MV-800 Owners Manual $5

Tektronix
DC505A Counter (bound copy) $20
FG503 Function Generator $25
FG504 Funct Gen. (SN <40000) $30
FG504 Funct Gen, comb bound copy (SN >40000) $20
PS503A Power Supply (back cover missing) $20
SG503 Leveled Sine Wave Gen $25

Yaesu
FT-101 service manual -- not quite complete copy though I think it has all the "real" service info, plus a dozen or so FT newsletters (copies) (1974-76) $30

FT-101E / FT101 ES (in Japanese) $10

All of the above plus shipping, if necessary, naturally.

********** Air Variable Capacitors ********

Hammarlund NZ-10 Neutralizing capacitors, shiny NOS, $25 pair

Johnson 154-506 Dual 153pF 3KV air variable used, good " shaft, $20ea (2 available)

Johnson D Series Dual 200pF .080 air spacing about 4"x4"x8" overall, " shaft $20

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, " shaft $2ea (2 available)

Cardwell 400pF, .045" air spacing, about 4"x4"x3" overall (plates open) " shaft. $5ea (2 available)

********* Ceramic Doorknob & Disk caps *****

These are all made by Sprague, they are either NOS or little used.
(Large) Doorknob style $15 ea

  2400pF 40KV (last one)

  These are used Centralab or similar -- $5 ea or 5/$20

  500pF 10KV   "TV" style
   68pF   5KV   850 series

  These are NOS disks by KD & Erie $3ea or 4/$10

  1500pF 7.5KV
  .01uF   4KV

  And a couple NOS Silver Mica caps.

  2200 pF 500V CM06 $1 ea
  5100 pF 500V CM07 (high current rating) $2 ea

All of the above plus shipping, if necessary, naturally.

********** Crystals and Oscillators**********

CTS Knights JKTO-47 970-2602 -- 1MHz ovenized oscillator
also bears Collins part number: 292-0308-010. Looks new, w/data sheet.
   Original cost was $325!   now only $50

US Army Signal Corps dual compartmented crystal case CS-137
with complete set of 120 FT-243 crystals -- channels 270 (5675 kc)
 through channel 389 (8650 kc) inclusive; all checked good! $300

PR Crystals Z6-A 100KHz -- $15 ea

Signal Corps octal cased Crystals -- $15 ea
     DC-9AJ 1000KC

DC-9D 1000KC
DC-15A 200KC

FT-241 -- 200 KC $10 ea

FT-243 -- 1000 1500 2000 2500 5000 5350(10.7 marker) 10000 -- $10 ea

Bliley AX-2 (FT-243 pin spacing) -- 3974.0 14125.2 $4 ea
CR-1A -- 5910 kc -- $4

FT-243 crystals -- $3 ea, 10 for $20, or $50 for all

1640.93 2506 2550 2637 3093 4035 4190 4280 4340 4450 4495
5295 5327.5 5500 5660 5995 6554.5 6555 6673.3 6783.33
7313.8 7340 7366 7825 7900 8230 8250 8330 8333.3 8405 8850
 12460 14346 14741 14760 14780 14800

HC-6 / CR-18 / CR-27 (large case modern) Crystals -- $3 ea, 10 for $20, or $50 for all
1152 2126 2142 2182(10) 2206 2512 2522 2565 2566 2597 2620 2638(5) 2670(5)

 Pair marked CH26 T&R KSS9GO ($6 pair)

Assorted larger cases
41.7 128 141.480 744 KHz -- $10 ea

Crystal pairs $10 pair
HW-202 Crystals
  146.37 T & 146.97 R
  147.345 T & 147.945 R

TR2200 Crystals
  146.37 T 146.97 R

TR2200A Crystals
  147.345 T 147.945 R

James Knights G-9 / Northern Electric T-9D/E Glass octal (tube style) base crystals
 97 KHz (split electrodes) 100 KHz 1 MHz -- $20 ea

Motorola B5490303P2 Crystal ovens, octal base $10 ea

Two Meter HC-6 & SC-17 Crystals $5 ea

x24 Transmit Crystals

```
  KHz     /   MHz
6036.66  /  144.88  (2)
6061.666 /  145.48
6083.750  / 146.01
6121.250   / 146.91
6122.5  / 146.94
6148.750 / 147.57

HC-6 for some Motorola Receiver
11348333 / 144.88
11398.333 / 145.48 (2)
11492.5 / 146.61

SC-17 for something

26982   / 146.91
27114  / 147.57

An HC-6 Pair
  144R89  145T49 one pin cut short on each

All of the above plus shipping, if necessary, naturally.

********** Test Equipment -- all functional!! ******

Bud GIMIX Wavemeter 80-10 Meters, has some white paint splatter just on the top. $10

Data I/O Unipack 2, PROM progamming fixture for 29A/B programmers. $50

DataPulse (Systron Donner) Model 101, 10 MHz Pulse Generator,
10 Hz TO 10 MHz in 6 Ranges, 8.5" x 4" x 11" deep $50

General Radio 758-A 55-400 MHz Wavemeter. Dial in need of severe polishing but, insides are clean. $30

Heathkit / Zenith ET-3100 Electronic Design Experimenter. Small protoboard plus 200Hz-20KHz Sine & Squarewave generator, individually variable +/- 15 V supplies, 30VCT AC source, 1K & 100K undedicated potentiometers. AC Line powered. $75

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF section,
8553B, and 8555A RF sections plus 8443A Tracking generator.
All original knobs, terminators,etc. clean and working fine; no internet "surprises"!
With manuals (or copies thereof...) for all units. $2200

Hewlett Packard 427A (transistorized) volt-ohmmeter with nice 4" mirrored scale. Reads as low as 10 mV full scale on AC and up to 1000V AC or DC. Including a spare battery and an original HP manual -- $75

Hewlett Packard 461A, 1 KHz - 150 MHz Amplifier,
50 ohm in/out, switchable 20 & 40 dB gain. $100

Harrison (later HP) 865B 40V .5A Max. Constant Voltage-Constant Current Laboratory Power Supplies $40 ea $70 pair

Hewlett Packard 4260A Universal Bridge -- measures resistors, capacitors and inductors. Also checks inductor Q and capacitor D using either internal 1KC source or external oscillator. Has "semi-auto" nulling feature in L&C modes. 6" hi x 8" wide x 12" deep overall -- 115/230 VAC powered. Cosmetically very good. $300

Kepco Dual PCX 15-1.5 MAT 15 volt 1.5 amp max lab power supply in Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Kepco Dual PCX 40-0.5 MAT 40 volt .5 amp max lab power supply in Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Polarad 1207A Microwave Signal Generator 3.7-8.4 GHz. $100

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Sierra Electronics model 164B Bi-Directional Power / SWR meter with 181-A-1000 element -- covers 200-1000 MHz with four power ranges: 10W, 50W, 100W & 500W full scale. Case is in fair-good condition finished in "Howard Hughes" (light) green -- leather carrying strap is in very good condition. N connectors (M&F) -- $100

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF power plus SWR. UHF connectors. $10

Tektronix P6006 10X Scope Probe (used) $10
P6012 10X Scope Probe (used) $10

All of the above plus shipping, if necessary, naturally.

********** RF Attenuators **********

Heavily built RF Attenuator, adjustable between 0-50dB in 10dB steps. 8" flying leads w/one terminated in a BNC Bulkhead female and the other with an N Male
connector. Looks like it should be good to at least 1 GHz. 3 1/2" diameter by 4" deep overall and weighs about 4 pounds each. There are tapped holes in the front frame for
panel mounting. No manufacturer is indicated. A 3/8" shaft adjusts by pulling (with a
spring return) and turning so there is no chance of inadvertent resetting. No knob
nor dial is included. $25

Tekscan LA-54 0-59 dB 50 ohm RF attenuator -- about 1.5" diameter by 4" long overall with concentric knobs (10db & 1 dB steps) & side mounted BNC connectors. 30dB position reads about 2.5 dB too high -- $35

Telonic TB-50A 0-10dB 50 ohm RF attenuator -- 3" diameter by 3" deep w/ side mounted BNC connectors. $25

Telonic TG-950 0-100dB 50 ohm RF attenuator -- Nine toggle switches attenuate by 1,2,3,6,10,20,20,20 &20 dB steps. 9" long by 2/5" hi by 2" deep

w/ end mounted BNC connectors. $45

 Mfg. Unknown, L-101A in-line VHF Waveguide-beyond-cutoff style attenuator,
-30 to -100 dB range. 10" long overall max. w/ UHF connectors. $20

6 dB low power pads with N connectors, male on one end, female on the other.
 Approx. 1"x1"x3" overall. 2 available $10 ea.

All of the above plus shipping, if necessary, naturally.

********** Old Radio Books & Catalogs **********

RCA HB-3 Tube Handbook
  Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
 updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
 Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
 Miscellaneous types, & semiconductors.   The updates appear to have been made in all
 these sections except Picture Tubes which is somewhat disorganized. It also appears that the
 obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
 Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Heathkit Catalogs
   1954, 55, 56, 57, 58, 59 &
   Fall-Winter '62-63,
   Xmas '89 + Winter & Spring '90 $100 all

Handbook of PREFERED CIRCUITS
 Navy Aeronautical Electronic Equipment
 vols. 1&2 (1955 tubes & 1962 transistors)
 very good condtion $40

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
  240 pages, solid schematics! Like new, $20

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $30

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
 -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
 owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose

Text is in GERMAN. Lots of photographs of electrical equipment,
 tools, machinery, and construction projects.
128 pages $10

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback
 Publications. This is a REPRINT by Vestal Press, 1984. Schematics &
some service info. 352 pages, like new $20.

All of the above plus shipping, if necessary, naturally.

This is New In The Box. My vertical came down this winter and
is beyond help. I had ordered it over the winter but now I have no
use for it. It cost $120.00 from HRO and you can have it for $95.00
shipped UPS ground.

Please Email direct as I am putting this on a few news groups.

Thanks and have a great day, John w1hzh

On sale at eBay, I have a Bird Wattmeter Slug Element, Model 4410-4. Covers
2-30MHz with 10kW. I only wish I had 10kW to begin with. :) So, I have
never used this element. Could be yours for the right bid.

For Sale: Bird model 43 watt meter with "N" connectors. Has a motorolla
label on it. Meter is in good condition and works well. I am getting rid
of it because I don't need three meters! Comes with shorting plug. No
elements.

Just a reminder to the folks that may see an original Yaesu FT101F
manual for sale this weekend (must be for an "F"), that I really need
one and would appreciate any help. I'll pay nicely.
Thanks
73
Al

And you had your ham license before you ever bought or built a radio,
right???

Sub: Mass marketing of illegal transmission equipment by Store.Yahoo.com

If you surf the web page below you will discover, as I did, that Store.Yahoo.com is now in the business of hosting a web site that sells illegal 30 watt CB gear on their web site. (See copy of the advertisement below.) To make matters even worse, the equipment they are selling also has Amateur Radio 10 meters capability. Already there is a nation-wide "problem" of "truckers" using the lower portion of 10 meters, as if it were part of the now unregulated CB service. As more and more of this type of equipment is sold to the general public, using mass marketing capabilities, more and more abuse of the amateur 10 meter band will occur.This type of irresponsible marketing of technical equipment will, eventually, destroy 10 meter amateur radio as we now know it.   All too soon, the 10 meter amateur radio band will be another unregulated CB-type waste land, occupied by CB level operations, complete with TURBO Echo - An AlphaForce Exclusive!

http://store.yahoo.com/stunmastercom/noname.html

You and I now have a choice. We can commit to stop this by voicing our extreme displeasure at marketing practices herein described to Yahoo.com management any any other firm doing such marketing, the ARRL, and the FCC. Or we can do nothing and watch our hobby continue to degrade to the point of no return.

The choice is ours. Perhaps the time has come when we must press for FCC regulations that REQUIRE an individual to possess a current valid amateur radio license to be allowed to buy a transmitter capable of transmitting on the amateur radio bands. It would be a beginning.

Copy of Store.Yahoo.com advertisement as of this morning.

Magnum AlphaForce 30 Watt AM/FM Mobile Transceiver CB Radio
With exclusive TURBO digital echo
Features
a.. Microprocessor Controlled Radio
a.. Full Coverage - 25.165 - 29.699 MHz
a.. All Mode Operation - AM / FM
a.. 30 Watts RF Output Power
a.. Variable Power Output Control
a.. 1 kHz / 10 kHz / 100 kHz Frequency Resolution
a.. 5 Digit LCD Frequency Display
a.. Back Lit Display with Dimmer
a.. Peak Reading RF (Modulation) Meter
a.. Signal (S/RF) & SWR Meter
a.. 5 Memory Channels
a.. RF Gain Control
a.. Microphone Gain Control
a.. Noise Blanker
a.. Automatic Noise Limiter (ANL)
a.. Frequency Scan
a.. Last Channel Recall

a.. Split Frequency for Repeater Use
a.. Receive Audio Tone Control
a.. Scanning Microphone
a.. TURBO Echo - An AlphaForce Exclusive!
a.. All Mode Talk Back - An AlphaForce Exclusive!
a.. Roger Beep
a.. 1 Year Warranty

GENERAL SPECIFICATIONS

a.. Frequency Range : 25.165 to 29.699 MHz
a.. Tuning Steps : 1 kHz, 10 kHz, or 100 kHz
a.. Modes : AM, FM
a.. Memory Channels : 5
a.. Antenna Impedance : 50 ohm, unbalanced
a.. Frequency Accuracy : Better than +10 ppm from 0 - 40 C
a.. Power Requirement : 12 - 13.8 Volt DC, negative ground
a.. Current Drain : Receive, Squelched 0.8 A
a.. : Receive, Max. Audio Output 1.5 A
a.. : Transmit 8 A maximum
a.. Dimensions : 7.875 (W) x 2.375 (H) x 9.5 (D) inches
: 200 (W) x 60 (H) x 240 (D) mm
a.. Weight : 5 lbs (2.3 kgs)

TRANSMITTER SPECIFICATIONS
a.. Power Output : 30 watts PEP - variable on all modes
a.. Spurious Emissions : Better than 60 dB below peak output power
a.. Carrier Suppression : Better than 40 dB below peak output power
a.. FM Deviation : +/- 2 kHz maximum
a.. Frequency Response : 400 - 3500 Hz
a.. Frequency Tolerance : 0.0005%
a.. Audio Response : 30 dB or Better

RECEIVER SPECIFICATIONS
a.. Circuit Type : Superheterodyne, Dual Conversion
a.. Sensitivity : AM 0.5V for 10 dB (S+N)/N
: FM 0.25V for 10 dB (S+N)/N
a.. S-Meter Sensitivity @ S9 : 100V
a.. Selectivity : AM / FM 6.0 kHz (-6 dB) 18 kHz (-60dB)
a.. Squelch Range : Adjustable from 0.6V to 1mV
a.. Intermediate Frequencies : AM / FM 10.695 MHz 1st IF
: AM / FM 455 kHz 2nd IF
a.. Image Rejection : 70 dB or Better
a.. Adjacent Channel Reject. : AM / FM 60 dB
a.. 1st IF Rejection : 70 dB or Better
a.. Audio Ouput Power : 3.0 watts into 8 ohms
a.. THD : 5% or Better at 500mW Output

Attention:
This radio does transmit on the 10 meter band as well as the 11 meter CB band. This does require a license with-in the US only. All other countries please regard your export laws there.

This radio is delivered opened to the 40 channels, peaked and tuned for maximum performance. PLease allow 10 days for delivery.

As far as a transmitter goes, that is correct. I built a Knight Kit R55A
receiver that I bought mail order from Allied Radio when I was 12 years
old. I listened to short-wave and the ham bands for about two years before
I obtained my first ham license. At this point, I ordered and built my
first ever transmitter - an Eico 720 c.w. transmitter - also from Allied
Radio.

I hope I have answered your question satisfactorily ?

I bought my first HF transceiver months before my xyl and I had our
licenses. It was an incentive for us to pass the first time. (She
passed the first time, I had to retake my code).

If more amateur radio operators were using the lower portion of 28.000
mhz then the truck drivers would not be there. Six years out out of
eleven, I don't hear anything on-the-band. I say let someone who will
use the frequencies have them. Now that I think of it, I don't know why
I put in my two cents, no one will hear my voice in the crowd. The
CB'ers are going to "purchase" the use of 25-30 mhz from the FCC anyway
in 2002.

Repeal the estate tax! Instead of taxing us the IRS should give
everyone with a SSN a $1000 rebate on the 1st of October every
year.   Therefore everyone gets a tax break! Of course when the
1st of April comes around the IRS will get 17-33% back! Of
course, Governor Ventura will get some of that too!

Letter
sent to Hams over a usergroup To:
All Responsible Licensed Amateur Radio Operators.
Sub: Mass marketing
of illegal transmission equipment by Store.Yahoo.com
If you surf the

web page below you will discover, as I did, that Store.Yahoo.com is now
in the business of hosting a web site that sells illegal 30 watt CB gear
on their web site. (See copy of the advertisement below.) To make matters
even worse, the equipment they are selling also has Amateur Radio 10 meters
capability. Already there is a nation-wide "problem" of "truckers"
using the lower portion of 10 meters, as if it were part of the now unregulated
CB service. As more and more of this type of equipment is sold to the general
public, using mass marketing capabilities, more and more abuse of the amateur
10 meter band will occur.This type of irresponsible marketing of technical
equipment will, eventually, destroy 10 meter amateur radio as we now know
it.   All too soon, the 10 meter amateur radio band will be another
unregulated CB-type waste land, occupied by CB level operations, complete
with TURBO Echo - An AlphaForce Exclusive! You
and I now have a choice. We can commit to stop this by voicing our
extreme displeasure at marketing practices herein described to Yahoo.com
management any other firm doing such marketing, the ARRL, and the FCC.
Or we can do nothing and watch our hobby continue to degrade to the point
of no return. The
choice is ours. Perhaps the time has come when we must press for FCC regulations
that REQUIRE an individual to possess a current valid amateur radio license
to be allowed to buy a transmitter capable of transmitting on the amateur
radio bands. It would be a beginning. Al

What a livley debate for a change.

Why worry ? those people using 11 meters are far more responsible than the
nutters we get round here on the C.B.....maybe we should ban cb ?????? if
you dont use the frequencies, why not allocate 11mtrs for those who want to
use it ? they seem to be quite reasonable people only interested in dx
ing.............why not leave them alone ?? they are not hurting
anyone......least of all ham operators.

I guess you're right... If all they want to do is work DX, then why not give
it to them. In fact, if all they want to do is work DX then why not let
them have some or all of 12m, 15m, 17m, 20m, 40m, 80m, and 160m? Then lets
change the Q signals to the 10 code so we can hear some of that "good buddy"
talk 10-4?

Many are too young to remember that once you actually applied for a license
to use CB. You had 5 watts, 19 channels and some decorum. Well that went
out with the pirates, and CB turned into the 2000 watt skip chasing mess
that it is today. But I guess you're right, after all, there is no need to
work for anything you want today... if you want it, you should be able to
have it free, or just bash the rights of those who did work to achieve it.

Dennis

Not hurting anyone? What about those truckers up on 10 meters? How
about those bleeding amplifiers? How about their interference to other
CBers trying to use the frequencies they are blasting over? I *might*
agree with you to a certain extent, but without regulation and enforce-
ment, how're ya gonna keep 'em down on the farm?

 Sorry, Pal, they have been inside the ten meter ham band for years now,
and are getting more brazen each week. THAT'S hurting hams.

SP DX CONTEST 2001

---

1. Contest organizers: The PZK - Polski Zwiazek Krotkofalowcow (Polish Amateur Radio Union) and the SP DX Club have the honour to invite radio amateurs and SWLs all over the world to participate in the SPDX Contest.

2. Date: Every year - the first full weekend of April (April 7 - 8 in 2001) from 15:00 UTC on Saturday to 15:00 UTC on Sunday.

3. Contest subject: To make the highest possible number of contacts among Polish HAMs and non-polish HAMs. Remember: Polish stations can work only other countries; stations from outside Poland can work only Polish stations in the contest.

4. Bands: From 1,8 to 28 MHz (without WARC bands).

5. Modes: CW and/or SSB. It is possible to work the same station twice a band but on different modes. No crossmode contacts. It is necessary to observe IARU band plan during the contest.

6. Contest CQ: Foreign stations: "CQ SP"; Polish stations: "CQ CONTEST" on SSB or "CQ TEST" on CW.

7. Exchange numbers:
   * Foreign stations send a five or six figure number consisting of RST or RS report + serial number, for example 599001 on CW or 59001 on SSB.
   * Polish stations give a two or three figure number representing the RST or RS report + one letter denoting the WOJEWODZTWO (province) abbreviation, for example 599G on CW or 59G on SSB.
   * Possible abbreviations of Polish provinces (max. 16 on one band): B, C, D, F, G, R, J, K, L, M, O, P, S, U, W, Z.

B=Lubuskie
C=Lodzkie
D=Dolnoslaskie
F=Pomorskie
G=Slaskie
J=Warminsko-Mazurskie

K=Podkarpackie
L=Lubelskie
M=Malopolskie
O=Podlaskie
P=Kujawsko-Pomorskie
R=Mazowieckie
S=Swietokrzyskie
U=Opolskie
W=Wielkopolskie
Z=Zachodniopomorskie

8. Points:
* Foreign stations: 3 points for each QSO with Polish station.
* Polish stations: DX QSO: 3 points; QSO with EU station: 1 point; QSO with another SP station: 0 points.

9. Multiplier:
For foreign stations: each different WOJEWODZTWO (province) denoted by the one letter abbreviation counts for one multiplier (counted only once per band). The maximal multiplier is 16 provinces x 6 bands
For Polish stations: DXCC countries (counted only one time per band)

10. Final score: The sum of QSO - points from all bands multiplied by the sum of provinces from all bands (or from a band in Single Band entries).

11. Categories:
* SO MB Mixed Mode,
* SO SB Mixed Mode,
* MO MB Mixed Mode,
* SO MB SSB,
* SO SB SSB,
* SWL's Mixed Mode,
* SO MB CW,
* SO SB CW.
** Note 1: Using DX nests, DXclusters will qualify a station for Multi Operator category.
** Note 2: Club (MO MB) stations should notify all operators.

12. SWL stations:
* Foreign SWL must copy the call-sign of the Polish station and its contest report and the call-sign of the foreign station
* Polish SWL must copy the foreign station call and contest report and call-sign of the Polish station.
* Scoring is the same as for stations in transmitting section. The same Polish station and foreign station can be listened only once on the same band/mode.

13. Final scores:Score tables will be held separately for each country and then for all categories for one country.

14. Awards: For first places in all categories. The number of awards in one category is the thing of the Contest Committee decision. Foreign winners can also receive special plates sponsored by Polish HAMs.

15. Contest logs:
Logs must contain date, time in UTC, correspondent call, exchanges, indicated multipliers and points. A summary sheet should contain all scoring information: category, contestant's name and adress and a signed declaration that all contest rules and regulations for amateur radio in the country of operation have been observed. Logs must be checked for duplicate contacts. A multiplier check list should be enclosed. Log can be sent on a floppy disc as a file (MS-DOS ASCII). The deadline for logs is April 30, 2001. Logs should be sent to the following addresss:

Polski Zwiazek Krotkofalowcow,
SPDX Contest Committee,
P. O. Box 320,
00-950 WARSZAWA,
POLAND

Logs can be sent also via e-mail (ASCII file) to:
<spdxc-logs@writeMe.com>.
It is recommended to use e-mail or disc logs if possible.

16. Disqualification: Violation of the rules of the contest or taking credit for incorrect or multipliers or duplicate contacts in excess 3% of total made will be deemed as sufficient cause for disqualification. The decisions of the SPDX Contest Committee are final and not contestable.

17. Additional information 1: SP DX Contest is fully supported by a demo version of Super Duper - contest log by EI5DI. It can be downloaded from author's WWW site at: <http://www.ei5di.com>.

18. Additional information 2: It is possible to apply for some Polish awards with no need to handle QSL cards from Polish stations if contacts are made during the SP DX Contest in 2001. Please check visit SP DX Contest Page at <http://www.sp5zcc.waw.pl/spdxc/index.html> for all information.

If you have any questions about the contest, please write to SP DX Contest 2001 Committee Chairman - Leszek SP6CIK <sp6cik@op.onet.pl>.
The organisers of the SP DX Contest 2001 have
the honour to announce that their sponsors have
contributed a number of trophies for the category
winners. Among them are:
1. For the best result by a woman world wide
(sponsored by Wanda SP7IWA).
2. For the youngest female participant
(sponsored by Krystian KB9TFT).
3. For the youngest male participant (sponsored

by Krystian KB9TFT).
With this information in mind, we would be
grateful if you could include any information
regarding your age and sex with your logbook.
We look forward to meeting you on the bands from
7-8 April 15.00 - 15.00 UTC.

SP DX Contest 2001 Committee Chairman - Leszek SP6CIK

Very tnx for reading ,see You in contest.

CB is the worse single thing that ever happened to radio, let alone
amateur radio.

It taught people and manufacturers they could ignore the law and get
away with it.

One could look at it in this way though.. CB was an exercise in democracy...
the people got what the people wanted. In that light, if not in a technical
one, it was a good thing.

What a load of crap! More liberal drivel and spin!

How about an exercise in anarchy. People wanted what belonged to others so they took it!

I repeat from my earlier post:

Many are too young to remember that once you actually applied for a license to use CB. You had 5 watts, 19 channels and some decorum. Well that went out with the pirates, and CB turned into the 2000 watt skip chasing mess that it is today. But I guess you're right, after all, there is no need to work for anything you want today... if you want it, you should be able to have it free, or just bash the rights of those who did work to achieve it.

I have a broken tube socket, anyone have something like this, or know who still makes them?

I have a piece of equipment which uses solid-state replacements for what were originally mercury-vapor rectifier tubes. The sockets are porcelain, with a cylindrical metal guide for the tube base. The metal guide has a slot in it to accommodate a pin which projects out the side of the tube base. You push the tube in, then turn it about 45 degrees.

I was told that E.F. Johnson still makes these, but they say they don't. The only EF Johnson I've been able to find are they guys who have been making radio equipment for about 1,000 years. They are still in the two-way radio business, but they don't carry tube sockets.

Anyone have one of these (there are at least two different sizes, I'd have to take measurements) or know where I should look to buy one new?

Please respond by email, as I don't read this group very often:

gomez (at) owlhouse (dot) org

you all are right this is a lively debate but i am a younster as far
as ham radio and cb go. i do know that history tells 11meter use to be
part of the ham band as well but lack of use in the late 60's and
early 70's lead to it being turned into a free public band and now
just take 5 min to listen to all the crap on it do we really want that
on are band i sure dont i use to be quit big in cb with my 1500 watts
and my president grant and all that but now look i have move into the
reall world of ham where you can have cival conversation i for one
agree with all this we need to do something or will lose it all and

that no joke!!!!!!!!!

I agree 100%! The rules STILL prohibit contacts more than 150 miles away,
and the FCC recently turned down a proposal to drop that rule. I believe
the rule that says you can only contact members of your own family or
business group, except in emergencies, is still on the books, too. You see
how many people follows those rules...none!

Run-time error R6003 -Integer divide by 0 error message. I get this every
time I try to program a radio. Can anyone help.
Thanks in advance RR.

For sale: More Transformers...

1) 115/120/125V primary / 1340V at 100 mA, no CT, 380V CT at 145mA,
plus 5V at
3A. Will sell for $44.00

2) 115V AC primary / 1000V at 160mA plus 6.3V at 5A, 5V at 2A and 7V
at 5A
Will sell for $48.00

3) 117V AC primary / 6.3V at 13 Amps plus 6.3V at 13 Amps
(Twop 6.3V windings) also two 24V windings at 1.5A each
Potted, size approximately 4" X 5" X 7" tall.
Will sell for $36.00

4) 115, 120, 125V Primary / 400V CT at 100mA, 6.3V at 15A,
6.3V at 8A and 6.3V at 3A.
Will sell for $38.00

5) Raytheon 115V AC Primary / 772V at 70mA, 10V at 26 Amps plus
TWO windings each 2.5V at 5 Amps (not CTs)
Will sell for $50.00

Shipping costs are additional. E-mail me for details or to arrange
purchase of any of these.

For Sale:
HAND-CRANKED MAGNETO GENERATOR! Produces 120V AC.
These will provide about 20 Watts depending on your cranking speed!
The size is about 3" diameter and 3" deep with a retracting handle.
Fluke freq meter shows around 20 Hz on one pair of terminals
and around 60 Hz on another.
You can mount these behind a sturdy front panel with a

single hole and the large nut provided.

Will sell for $25.00 each plus shipping

QTY 4 available. E-mail me for details or to arrange purchase
of these.

REMOVE THE "NOSPAM" to E-mail me!!

More details at:

FS: Johnson Viking Matchbox (HF Antenna Tuner), covers 80 through
10-Meter bands. This is the smaller 275 W Matchbox (not the big KW one).
It has coaxial inputs/outputs, and has the (optional) internal antenna
relay to switch between transmitter and receiver. All original knobs,
some scratches as usual for gear this old, jpg picture available on
request. $75 plus shipping.

Still looking for an excellent to mint condition Kenwood TS-450S AT. I thought I had found one last week but the radio had a problem and the gentleman was honest enough to call off the deal when he discovered it...

I'd prefer a 450 with the narrow SSB filters already installed, and not interested in anything with severe scratches, scuff marks or dents.

Thanks,

John

Late WW II???

Five 78 rpm records (10 sides) (very good condition) in album (fair to good) with small 32 page paper-cover instruction manual (very good).

Titled:

International Morse Code
A Course of Practical Instruction
prepared by Lt. Commander F.R.L. Tuthill, USNR and Lt.(JG) E.L. Battey, USNR

Made by:

Insuline Corporation of America, Manchester, NH and Long Island City, NY.

Interest/questions/offers via email.

Mike Gray
long ago and far away K1LFP
can still copy code but can't remember to zip up my fly.

Wanted
Dead, or Alive
ICW-2ATs for parts.
Prefer case of one to be in relatively good shape:

These were about the most trouble prone HTs Icom ever made, hence the need for parts.
I purchased two when they first came out. Never kept them running for more than a month or two at a time. They've been in a drawer for the last 6 years and I decided that I'd try to get them going again...Unless some one else wants them worse than I do.

I have two Bird 43 inline Watt meters for sale. Both come with the
shorting plug, but no case or elements.

The first one is in near perfect condition, with no scratches, scrapes
or dents, and only two tiny spots where the paint is missing. Also, it
has the PL-259 connectors. I would like to get $170.00 plus shipping for
this one but will consider offers.

The second one is in good condition, but does have some wear spots: no
dents, but some paint is chipped and shows signs of use but not abuse.
It has 'N' connectors. I would like to get $160.00 plus shipping for
this one but will consider offers.

I have several elements avalible: 100C for $60, 10D for $40, includes
priority mail shipping and insurance. I may decide to sell some of the
other element I have so, inquire if interested. Also, I have pictures of
all availble.

I have a number of extra pieces of Amateur Radio equipment I am selling.

Icom IC-2AT (the one with the keypad!) Includes antenna, DC adapter
pack, and a BP-3 battery pack. The radio is in very good condition and
would make an excellent unit for an APRS setup, mobile/portable packet,
Fox transmitter, or a backup 2M rig.

Picture of unit: http://www.eskimo.com/~ghopper/IC2AT.jpg

I would like $75 for the unit but would consider reasonable offers.

email me at ghopper@eskimo.com

I am also selling: an IC-02AT, condition questionable, IC-03AT, 2M
35watt amp, Bird Watt meters and elements, Clamp on AC ammmeter, B&K
high voltage probe, and a number of other items.

I have a number of extra pieces of Amateur Radio equipment I am selling.

Icom IC-02AT. The radio is in questionable condition and would make an excellent parts unit, though it might be repairable. The unit does power on and the reciever makes noise. The display shows 0.00

Picture of unit: http://www.eskimo.com/~ghopper/IC02AT.jpg

I would like $45 for the unit but would consider reasonable offers.

email me at ghopper@eskimo.com

I am also selling: an IC-2AT, condition very good, IC-03AT, 2M 35watt amp, Bird Watt meters and elements, Clamp on AC ammmeter, B&K high voltage probe, 2M amp, a blasting machine, B&W CCD video camera and a number of other items.

Jim,

Meter #1 is a Bird 43 with UHF connectors. The unit is in very good to excellent condition. Comes with the shorting plug. No case, no elements.
Pictures:
http:/www.eskimo.com/~ghopper/birdf1.jpg Front
http:/www.eskimo.com/~ghopper/birdtop.jpg Top
http:/www.eskimo.com/~ghopper/birdstrap.jpg Strap
http:/www.eskimo.com/~ghopper/birdback.jpg   Back
http:/www.eskimo.com/~ghopper/birdlt.jpg Left
http:/www.eskimo.com/~ghopper/birdrt.jpg Right
http:/www.eskimo.com/~ghopper/birdbot.jpg bottom

The jpgs are large and show a lot of detail because I had someone who was very interested in the condition (apparently a collector) and had offered $180 but within the hour had emailed back that he had decided on another unit. Go figure. I would like $170 for this unit but will consider reasonable offers once the unit has been posted for sale for a while.

Meter #2 is a Bird 43 with N connectors (male/female). The unit is in fair to good condition. Comes with the shorting plug. No case, no elements.
Pictures:
http:/www.eskimo.com/~ghopper/nbirdf.jpg Front
http:/www.eskimo.com/~ghopper/nbirdt.jpg Top
http:/www.eskimo.com/~ghopper/nbirdb.jpg Back
http:/www.eskimo.com/~ghopper/nbirdl.jpg Left
http:/www.eskimo.com/~ghopper/nbirdr.jpg Right

This unit has a 'Motorolla' label however, it is identical to 'Bird' bird meters with the exception of two extra screws holding the back on. The unit has some wear but looks good and works fine. I would like $160 for this unit but will consider reasonable offers once the unit has been posted for sale for a while.

I have two elements that I am immediately putting up for sale. Several others have already been sold, pending the receipt of funds. I may elect to sell others depending on how fast this stuff sells and/or the size of offers I get for the other elements.

The two are a 10D (200-500 Mhz, 10 watts) for $40, and a 100C (100-125 Mhz, 100 watt) for $60.
Picture:

 http:/www.eskimo.com/~ghopper/elements.jpg

I also have a 250B, 500D, 25E, 100E, and 250E that are surplus to my needs and I may sell if I get a sufficient offer.

All items are plus shipping. All items are guaranteed against DOA, and are otherwise sold as-is. Payment by cashier's check or money order

Thanks for considering these items.

Grant Hopper
KB7WSD
ghopper@eskimo.com

I am also selling: an IC-2AT, condition very good, IC-02AT condition questionable, IC-03AT condition very good, 2M 35watt amp, B&K high voltage probe, 2M amp, a blasting machine, B&W CCD video camera, Kenwood SP-230 speaker, an Icom BC-35 battery charger, old video camera power supplies ($5 ea) which I have used as power supplies for other projects (built-in), and a number of other items.

 have two pieces of what I would call "vintage" commercial radio equipment.

One is a GE Transmitter/Receiver combination; all vacuum tube, power amp
uses a 5894. Currently set-up for 168.99 Mhz. This is the original cabinet which is about 3 feet tall, 2 feet wide and about 10" deep (kinda
of like a big cereal box). The receiver and transmitter are on separate

chassis and can be removed from the cabinet. each has its own integral power supply. Weighs 60 - 75 lbs (estimate)

The second is a Motorola repeater set-up for 412.0125 Mhz transmit/417.0125
Mhz receive. This appears to be vintage solid state. Weight is around 80
lbs+ (estimate). Cabinet is similar size and shape to the GE unit above.
Model number is XC34MSY-3IQ1CT.

These were both working when taken out of service last year. I bought 'em
but I really doubt I'll get around to using them (too many other projects
on the go).

Any interested parties out there, please make reasonable offers. I'm not a
VHF/UHF guy, so if these are just plain junk, feel free to tell me so.
There's a good pile of parts in these that I can use for something else.

Thanks

Phil

TRADE: RCA VHS CAMCORDER MODEL CM300 in good serviceable condition. Camera uses full size VHS tapes. No fiddling around with 8 mm adapters and special tapes. Camera is color, auto focus, zoom. Video and sound is excellent. Battery is excellent. Comes with battery charger, good battery, accessories, and carry case. Ready to use after you give the battery a fresh charge. Will trade for ham gear. Looking for just about any useful ham gear or instruments.

Darn, looks like it's going to be "Lightening Rods" at 100 meters at high noon
if this thread continues.

Go for it, this is getting better than Marshall Dillon at high noon.

Hello Dana:
My friend's IC751 might soon turn into scrap, if he is not able to determine the correct value of the resistors associated with the internal fan motor. One resistor has burned out and he has placed a short across the terminal points.....
Can u provide me the resistance and wattage rating for the two resistors used in the fan motor speed circuit?
Pse post or reply to wa.tworsx@verizon.net.

Kenwood Dual Bander TH-79A, unit on a scale of 1 to 10 is a 9, this unit has
had Mod done, I used it for testing business band repeater systems, so
actual hours are low, comes with battery and dual pocket drop in rapid
charger, and manual, the manual is in poor shape as it was carried around in
my truck, but all info is there. Offers accepted for one week starting today
3/15/01. then it goes to Ebay, Email Me to make an offer, if you use the
reply button remove the x's in the email address, or use this link
radman@together.net .

Thanks Mike

TRADE: RCA VHS CAMCORDER MODEL CM300 in good serviceable condition. Camera uses full size VHS tapes. No fiddling around with 8 mm adapters and special tapes. Camera is color, auto focus, zoom. Video and sound is excellent. Battery is excellent. Comes with battery charger, good battery, accessories, and carry case. Ready to use after you give the battery a fresh charge. Will trade for ham gear. Looking for just about any useful ham gear or instruments. If interested, contact K4ICL@worldnet.att.net.

Excuse the break David, enlighten me on what the problem with ebay is. I use it and haven't had any problems. If this is part of a thread, I haven't been following it, so I am not informed on what your concern with them is. I figure it must be pretty serious if you are encouraging hams to do what in radio we would consider unforgivable sins of jamming and using false call signs. Let me know.

David wrote:

> I would suggest that hams on this news group use bogus e-bay accounts to bid
> up items and then say that they change there mind and do not want the item.
> This can be done buy getting a free internet acccount. This way when you get
> kicked of e-bay for non paying bids you can get more e-bay accounts under
> differant names.
>
> NO E-BAY

The Uniden Bearcat BC-9000XLT is a scanner offering great frequency coverage. This models covers virtually every frequency from 25 MHz to 1300 MHz (less cellular, although clear images are between 360~385MHz!). It receives military frequencies not found on most other scanners. You get 500 channels organized in 20 banks of 25 channels each. A VFO control (manual tuning knob) enables fast selection of memories or frequencies. TurboScan allows you to scan up to 100 channels per second and TurboSearch lets you select either 100 or 300 steps per second when searching VHF frequencies. The automatic store feature searches out active frequencies and automatically stores them for you in an available memory location.
Selectable mode allows you to change the default receiving mode (AM, FM-wide or FM-narrow) to hear all the action. You can also change the default step sizes!
Advanced features include: Two Line Alpha LCD, allows you to label your frequencies, i.e.; "Detroit Police", Delay Key (2 seconds), Channel Lockout, Data Skip (the scanner skips over non-voice channels), Backlight Dimmer, High Cut Audio Filter and tape recorder activation. External jacks include: BNC antenna, external speaker, line out, aux jack and DC power. The BC9000XLT comes with: AC adapter, telescopic antenna and Owner's Manual. Size: 10.5x3.5x7.375 inches. Frequencies: 25-550 MHz,

760-824 MHz, 849-869 MHz, 894-1300 MHz!
Includes Uniden's optional CTCSS tone decoder board, installed!!! Like
new condition, complete with A.C. Power Pack, Antenna, Original Box,
User Manual, etc.
Note: This scanner has been discontinued by Uniden, and to the best of
my knowledge, distributors stocks have been depleted. $250.00, including
shipping within U.S., lower 48 states. John English

NE-51   22
NE-79   1
CM-81A 3

& an OSRAM N32 marked 380V
plus a couple other screw-in types on which I can't read the numbers

These are a mix of new and used, mostly made by GE, though I saw a few Westinghouse and RCA while I was making the list -- they probably average 40 years old and most of the bases are somewhat tarnished from age.   I lit up a couple of the larger ones and they seem to work ok -- a transistor curve tracer works great to test these.

If anyone would like the whole bunch, I'll take $75 for them all.

Plus shipping, if necessary, naturally.

Brand new, never used, separation kit for FT-900 transceiver. With this kit
you can mount the front plate of the FT-900 on or near the dash of your
compact car and mount the main body of the unit in the trunk, out of the way
and safe. This kit has all of the mounting hardware and the special
interconnect cable. It has never been used and is its original plastic
packaging. Price is $45 Firm, no trades.

Hallicrafters S-38D Receiver in good working condition.
This is a silver-gray version of the S-38D (not blond color). Has all
original knobs and a very nice back panel.

It works well, and has a nice-looking original power cord.
Will sell for $55.00 plus shipping

First time ever offered ! Mint IC2KL solid state amp and matching At 500 automatic antenna Tuner. Asking $1700 with some help on shipping cost! Beautiful compliment to the Icom rigs! Non smoker, includes cables and manuals! With Icom radios, provides automatic band and antenna selection! A joy to work DX with! Amp alone sold for over $3000. I can be called at 763-389-3966. Picture provided upon request! Thanks Dan

He Guy's, I'm posting this on in a few different places, not sure where
the expertise may be.

I'm putting together a HF mobile (706-tuner-whip) going to put it in a
Jeep Sahara.

DOES ANYONE KNOW IF THESE VEHICLES ARE KNOWN TO HAVE INTERFERENCE
PROBLEMS, Noisy electrical systems, fuel pumps and the like ?

Jim

Not specifically. Just make sure you use a good braided ground strap
from the chassis directly to ground and wire the power directly to the
battery and you should be ok.

If you are going to use it on the higher HF bands, a simple whip is ok. On the lower bands, it will load, if you use a SGC-230 type tuner. If you try a cheaper tuner, such as a LDG, it probably won't. Too much inductance needed. Even if you do manage to match the whip, the radiation efficiency will be unacepptably low. Trust me: get a loaded whip of some sort. SGC uses one that has a self resonance point around 14 MHz. That loads from 80-10 meters. Jim

jhilins,
    I have no idea if the Jeep is more susceptible to RF than other vehicles, but I'll offer this. Route all cables as far from the 'computer' as possible. Do NOT use braid as a ground strap, it will deteriorate in weather. Instead, use a copper strap such as the flashing used around roofs. And make the best mechanincal connection you can. Most problems with mobile antennas usually come back to grounding.
    The standard steel whip, or SGC's whip are useless on the lower HF bands. They ~will~ load, but no one will hear you. If your going to use 80 and 40 meters, invest in some kind of loaded antenna, otherwise you will be a very frustrated camper.
                    'Doc

PS - Also, invest in a 5 gallon bucket of torroids...

Doc, I've been using braid for grounding straps for 35 years... no
problems.

I occasionally set my TS850 in the seat next to me and use
a Hustler antenna on 20 meters...no special wiring...just ran
the power from the 850 directly to the battery...use RG58
to the antenna mounted on the rear bumber...has worked
fine, little or no ignition noise from a 97 TJ.

I'm looking for the service manual for a Sunair Electronics ASB-500
control head and RT510 transmitter. Even if I can get the wiring
diagrams for the cable between the control head and the transmitter that
would be great.

Please e-mail me if you can help me out. va7ame@rac.ca

Doc,

It amazes me that the tuner/whip combinations garner any sales at all. Of course, it is just MHO, BUT that opinion is based on many years of HF mobile study, installation, and mistakes. In some cases, a hamstick will outperform those things--and a hamstick is just about the worst thing on the lower bands. I wouldn't waste my time, nor my hard earned cash, on those things.

It is an unfortunate thing that some people *really* believe that a "tuner" actually "tunes" an antenna. I had such a conversation with a supposedly knowledgable Extra class last week! When I pointed out that tuners don't "tune" the antenna, he confidently assured me that a certain brand of "tuner" both (quote) "physically and electrically" tune the whip! PHOOEY! I hear sub-standard mobiles on the air all the time. They are often down in the mud, unreadable, or just not even *there*. Yet their owners swear by the "great" performance their tuner/whip combo is giving, how "good" their hamstick (dummy load on a stick) is, and my question is always: Compared to WHAT? Put 'em in field trials, run field strength tests against bugcatchers and screwdrivers. See the

superior field strength of competitive, high Q, RESONANT antennas--it'll
make ya sick! I guarantee your tuner/whip or hamstick will get MASHED
in a field trial.

Now, having thrown off on the tuners, etc, let me say this: Certainly,
there are times when it is not feasible to use higher efficiency
antennas. The spouse threatens bodily harm if you drill holes in the
new car, or there is no way to attach a big antenna. You do what you
have to with what you can. And that is understandable. But if you are
out for the best signal you can obtain, it takes a BIG, UGLY antenna to
do the job.

Jeez Jerry, you're confusing the heck out of me.

Didn't you say a couple of weeks ago when someone asked about wiring a
CB to: wire the hot side to the battery and the neg side to a nearby
bare metal groud?

I had thought of wiring my CB direct to the battery (pos & neg, both
fused) and then had second thoughts after reading that post of yours.

Now I've interpretted your post below to say pos and neg to battery.

Paul

No, the braided (or whatever) ground strap I was referring to goes
between the radio's chassis and the Jeep body or chassis. It's just
that a braided ground strap provides not only a good DC ground, but a
good RF ground too. The positive side still goes to directly to the
battery through an inline fuse. The rule-of-thumb is that the ground
wire should go to the closest possible electrical ground. The ground
wire can either be the black wire, or simply a ground-wire (or braided
ground wire) connected between the radio's chassis (like a cabinet
screw) and the Jeep's body or chassis. HTH!

Jerry

Hello, go with a screwdriver antenna, it does not need a tuner...its big,
its ugly, but it beats everything else, that I've tried. Hamsticks work
soso above 40m, but for 75 go with the screwdriver. Ground the rig to

nearest chassis ground, just grounding thru the coax shield is not good enough. It will work some without it but will work better with chassis ground.   I've used a 706 for a couple of years and have learned the importance of good grounds and good antennas. On the bugcatcher, they work fine, but everytime you want to change frequency you have to stop and move the jumper. Hope this helps...AL

********** Homebrew Radio things ********************

Many hams build things with a large investment in time & parts that are worth far less... later.   Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not

all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Fully populated 2.5" x 5.5" homebrew PCB w/ two 1496 balanced mixers, a couple slug tuned coils, plus a CA3001-- I only see power connections; Don't know what this does! $4

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $5

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $5

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $5

435 MHz power splitter with (3) N connectors. This made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 440. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

VLF Up converter -- Converts 30KHz - 530KHz up to the 3MHz Range -- 6" x 4.5" x 1.25", requires external +12V -- $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz receiving converter (I think!) -- 5" x 4" x 1.75" -- $12

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $12

Active Field Strength Meter -- Schematic per 1985 ARRL Handbook p 39-10. Built in a 5" x 4" x 3" black crackle finish metal case with a Simpson Model 29, 4" meter, covering the entire front of the box. -- $15

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $30

All of the above plus shipping, if necessary, naturally.

Three 5CM diameter knobs that look like they are from a Kenwood TS-830 (main
tuning knob) or similar
One is "stock", one has been filled in back with shot to give it some heft,
and the third is the spinner version. These are used with just a few minor
blemishes visible in the aluminum disks; the plastic part looks fine.
Asking $30 for all three.

Plus shipping, if necessary, naturally.

Model X53GJV-1091A Two-Way FM Radio (160-174 MHz)
service manual (copy) $15

Radio Shack
CT-101 Cell Phone Owners Manual $5
CT-101 Cell Phone Service Manual $20
SA-10 Stereo Amplifier $2

RCA
WR-64B Color Bar Generator(copy) $5
5-E 5KW AM Broadcast Xmtr $50

Sabotronics
2000 DMM $10

Signal One
CX7A (partial copy -- schematics mostly) $10

Teac
MV-550 VCR Service Manual $20
MV-800 Owners Manual $5

Tektronix
DC505A Counter (bound copy) $20
FG503 Function Generator $25
FG504 Funct Gen. (SN <40000) $30
FG504 Funct Gen, comb bound copy
(SN >40000) $20
PS503A Power Supply
(back cover missing) $20
SG503 Leveled Sine Wave Gen $25

Yaesu
FT-101 service manual -- not quite complete copy
though I think it has all the "real" service info, plus
a dozen or so FT newsletters (copies) (1974-76) $30

FT-101E / FT101 ES (in Japanese) $10

********** Old Radio Books & Catalogs **********

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with

additions and
 updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
 Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
 Miscellaneous types, & semiconductors. The updates appear to have been made in all
 these sections except Picture Tubes which is somewhat disorganized. It also appears that the
 obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
 Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Heathkit Catalogs
   1954, 55, 56, 57, 58, 59 &
   Fall-Winter '62-63,
   Xmas '89 + Winter & Spring '90 $100 all

Handbook of PREFERED CIRCUITS
 Navy Aeronautical Electronic Equipment
 vols. 1&2 (1955 tubes & 1962 transistors)
 very good condtion $40

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
  240 pages, solid schematics! Like new, $50

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $30

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
 -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
 owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
 tools, machinery, and construction projects.
128 pages $10

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Doings Vol 15, #1 June 1929 edition

cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback
 Publications. This is a REPRINT by Vestal Press, 1984. Schematics &
some service info. 352 pages, like new $60.

Plus shipping, if necessary, naturally.

Sanyo-Denki 103-775-0611 Stepper Motors -- 1/4" dia. shaft extends about 3/4"
out each end.
Outer Case is about 2.2" round, with a square flange on one end, by 1.5" deep.

1.8Deg (200 step/rev) 2.25V, 1.25A, 8 lead configuration presently wired as 4
lead units
(I think the coils are wired in series for bi-directional drive) to "Molex"
connectors.
 RFE 10 pieces, $100 all

Plus shipping, if necessary, naturally.

Jerry,
   Your lucky. In this part of the country, if braid
is exposed to the weather, it lasts maybe 6 months.
Then you start getting some really weird changes.
                  'Doc

Jerry,
    Always remember the first rule of HF mobiling. "The worth
of an antenna is directly proportional to it's ugliness."

Hi Sean.... Noticed the your name while going through postings.
Was talking with your dad last night and had asked when you will set up IRLP
up there.... I guess you have no support yet...

Looking to trade a Icom IC-746, SM-20 desk mic & CT-17 computer
interface (Never used) for a Icom IC-706 MK II G with the seperation
kit. The 746 and mic are about 9.5 on a scale of 10. Pictures provided
by email if you would like. The 706 should be mint to very good
condition. On air evaluation of 746 available.
The only stipulation on the trade is that I would be able to test 706 for
1 to 2 days before shipping 746. Been had on trades before and won't
trade "DOWN" to a bad rig again. If this isn't agreeable, please don't
bother emailing back.
BTW I also have original box for 746 and it has never been mobile.

TNX & 73's. Jack Lovell. WD9IFW

Yes I tried two of the 800w amps. Which were really labeled by the
manufacture as 600 w amps I questioned this and was sent formulas to show
that I and the manufacture were wrong. In the ad I have not seen the word
input.And the reason for trying two is that the first did not work properly
I contacted Justin De Polis who is selling these amps,He promptly sent a
second which also did not work.after a few exchanges he reluctantly agreed
to refund my money. I have not received it yet,I have contacted him many
times he gave me a promised date that the refund would arrive that has come
and gone and still no refund. His promise is no better than the amps.

We've joined in.... Attached is a copy of an email just sent to the =
Chairman and all the commissioners of the FCC as well as the ARRL....

The email addresses are:

To: <mpowell@fcc.gov>
Cc: <sness@fcc.gov>,
 <hfurchtg@fcc.gov>,
 <gtristan@fcc.gov>,
 <hq@arrl.org>

I hope others will join the chorus.

Dennis Stahr - W6NYC

Dear Chairman and Commissioners:

My wife and I are Ham radio operators. We earned our license by = passing the 13 wpm code requirement and the required written exam.

We are distressed by the activities that are taking place which are = beginning to bring an end to the integrity of our hobby. We have all = seen what has happened to the "rogue" CB band, and how there are no = rules followed, and how massive rules violations go unpunished. We do = not want that to happen to our amateur bands.

Please view the attached URL for a sickening advertisement page, and = please read the letter of concern (below) being expressed by so many = hams today.

We need your help to stop this blatant attack on the earned privileges = of those who chose to take the time and energy to learn and pass the = requirements to operate and experiment in these allotted bands.

Please help us!

Thank you,
Dennis Stahr - W6NYC
Ingrid Stahr - W6SGW

Illegal ad page:=20

http://store.yahoo.com/stunmastercom/noname.html

Letter sent to Hams over a usergroup

To: All Responsible Licensed Amateur Radio Operators.

Sub: Mass marketing of illegal transmission equipment by = Store.Yahoo.com

If you surf the web page below you will discover, as I did, that = Store.Yahoo.com is now in the business of hosting a web site that sells = illegal 30 watt CB gear on their web site. (See copy of the =

advertisement below.) To make matters even worse, the equipment they are =
selling also has Amateur Radio 10 meters capability. Already there is a =
 nation-wide "problem" of "truckers" using the lower portion of 10 =
meters, as if it were part of the now unregulated CB service. As more =
and more of this type of equipment is sold to the general public, using =
mass marketing capabilities, more and more abuse of the amateur 10 meter =
band will occur.This type of irresponsible marketing of technical =
equipment will, eventually, destroy 10 meter amateur radio as we now =
know it.   All too soon, the 10 meter amateur radio band will be another =
unregulated CB-type waste land, occupied by CB level operations, =
complete with TURBO Echo - An AlphaForce Exclusive! =20

  You and I now have a choice. We can commit to stop this by voicing =
our extreme displeasure at marketing practices herein described to =
Yahoo.com management any other firm doing such marketing, the ARRL, and =
the FCC. Or we can do nothing and watch our hobby continue to degrade =
to the point of no return.

  The choice is ours. Perhaps the time has come when we must press for =
FCC regulations that REQUIRE an individual to possess a current valid =
amateur radio license to be allowed to buy a transmitter capable of =
transmitting on the amateur radio bands. It would be a beginning.

Have you checked out the YAHOO auction site? They do no screening of
any kind. I have seen many illegal items listed. Modified amps,
radios, etc.

EBAY does screening, sometimes to the extreme, but YAHOO does nothing.
EBAY shows that it can be done on a large auction level.

You might want to mention that the YAHOO auction site also facilitates
the sale/transactions involving illegal radio equipment.

Letter
sent to Hams over a usergroup To:
All Responsible Licensed Amateur Radio Operators.

Sub: Mass marketing
of illegal transmission equipment by Store.Yahoo.com
If you surf the
web page below you will discover, as I did, that Store.Yahoo.com is now
in the business of hosting a web site that sells illegal 30 watt CB gear
on their web site. (See copy of the advertisement below.) To make matters
even worse, the equipment they are selling also has Amateur Radio 10 meters
capability. Already there is a nation-wide "problem" of "truckers"
using the lower portion of 10 meters, as if it were part of the now unregulated
CB service. As more and more of this type of equipment is sold to the general
public, using mass marketing capabilities, more and more abuse of the amateur
10 meter band will occur.This type of irresponsible marketing of technical
equipment will, eventually, destroy 10 meter amateur radio as we now know
it.   All too soon, the 10 meter amateur radio band will be another
unregulated CB-type waste land, occupied by CB level operations, complete
with TURBO Echo - An AlphaForce Exclusive! You
and I now have a choice. We can commit to stop this by voicing our
extreme displeasure at marketing practices herein described to Yahoo.com
management any other firm doing such marketing, the ARRL, and the FCC.
Or we can do nothing and watch our hobby continue to degrade to the point
of no return. The
choice is ours. Perhaps the time has come when we must press for FCC regulations
that REQUIRE an individual to possess a current valid amateur radio license
to be allowed to buy a transmitter capable of transmitting on the amateur
radio bands. It would be a beginning. Al

I'm glad the truckers are joing in on our hobby. It's about time these =
"Code Requirement" elitists get knocked off their pedestals. I took all =
my tests from the FCC and sweated the code test under the most grueling, =
unrealistic and uncomfortable (jackhammers were ripping up the street =
outside and the windows were open) conditions. While I do hold a =
fascination for that mode and admire those who have mastered it, I =
choose to explore the more technical aspects of the hobby instead and =
went on to construct one of the most complex repeater systems (for the =
time anyway) that serves to this day anyone who wants to use it. =20
For that, I am currently under indictment by the FCC, (go to =

www.rainreport.com) for the "crime" of not being able to control what =
users say on my system. How can any owner or control op stop users who =
may violate the rules? Shut everything off? That's their goal which =
means they win and everyone else loses. If it applies to me, it will =
apply to all other owners and control ops which means they now get cited =
if someone says a naughty word or anything else they deem inappropriate. =

It's the elitist old timers who instigate these actions by insisting =
that the FCC do something about these damn no coders!=20
We have proven ourselves not fit to have exclusive use of these bands so =
"send in the clowns".

the=20
```

business of hosting a web site that sells illegal 30 watt CB gear =
on their=20
web site. (See copy of the advertisement below.) To make matters =
even=20
worse, the equipment they are selling also has Amateur Radio 10 =
meters=20
capability. Already there is a nation-wide "problem" =
of=20
"truckers" using the lower portion of 10 meters, as if it were =
part of the=20
now unregulated CB service. As more and more of this type of =
equipment is=20
sold to the general public, using mass marketing capabilities, =
more and=20
more abuse of the amateur 10 meter band will occur.This type of=20
irresponsible marketing of technical equipment will, eventually, =
destroy=20
10 meter amateur radio as we now know it.   All too =
soon, the 10=20
meter amateur radio band will be another unregulated CB-type waste =
land,=20
occupied by CB level operations, complete with TURBO Echo - An =
AlphaForce=20
Exclusive!</FONT></FONT></FONT> <FONT face=3DVerdana><FONT=20
color=3D#0000ff><FONT size=3D-1>You and I now have a choice. =
We can=20
commit to stop this by voicing our extreme displeasure at =
marketing=20
practices herein described to Yahoo.com management any other firm =
doing=20
such marketing, the ARRL, and the FCC. Or we can do nothing =
and=20
watch our hobby continue to degrade to the point of no=20
return.</FONT></FONT></FONT> <FONT face=3DVerdana><FONT=20
color=3D#0000ff><FONT size=3D-1>The choice is ours. Perhaps the =
time has come=20
when we must press for FCC regulations that REQUIRE an individual =
to=20
possess a current valid amateur radio license to be allowed =
to buy a=20
transmitter capable of transmitting on the amateur radio bands. It =
would=20
be a beginning.</FONT></FONT></FONT> <FONT =

Excuse me, folks, but are you really asking to have ALL amateur radios
removed from the market? THAT is what you are saying when you demand
that no one ever advertise any ham equipment anywhere that a non-ham
would read the ad.

Yes, let's force all those slime out of business -- slime like Icom,
Yaesu, Kenwood, ADI, Alinco, and of course Motorola. All the worthless
scum who build radios that can be used by someone without a license or
that can be turned outside the band where the radio is supposed to be
used.

Just do one thing for me, would you please name any company that would
NOT be put out of business if you get your way.

Will trade Yaesu FT-2200 VHF for similar UHF amatuer or commercial
mobile radio.

The 2200 is in excellent shape. Original box, manual, mounting bracket,
seldom used. MARS/CAP modified (140-174 MHz TX, 110-180 MHz RX,
110-139.995 AM RX).

I'm looking to buy a good, used, rather *inexpensive*, HF transceiver for my nephew who passed his license test last week. His main interest seems to be CW for now...

The rig doesn't have to be 'fancy' - as long as it's 100% operational.

I'd like to get him something with an accurate digital readout, adjustable 5 to 100 watts output, and a good receiver to get him going.

I'm not interested in any gear that uses tubes, a radio with 'problems', or scratched up/dented equipment - after all, it's a present.

Let me know?

Thanks,

John

I have a beautiful Yeasu FT-840 HF transceiver that cover the 160-10 meter bands. Is all solid state, with 100 memories. Comes with all the original factory items (stock mic, owners manual, DC power cord, box) and also comes with the optional AM filter, CW filter, and the FM board. Radio does not have a built-in tuner. Just add antenna and 12 VDC power supply and your nephew will be ready to go.

Radio is in mint condition...the reason I am selling is that I have too many radios. Will ship insured UPS for $ 500.

Email me if interested.

Larry, K8PF

GE MP-A VHF 146.-174. 160 channels Aegis digital encryption w/ battery and charger 9-9.5 condition. works great I use it daily. $375.00
GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE Monogram SP2550 VHF ex CSX radio with battery and charger $100.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
GE Master 2 UHF 75 watt. with pre-amp no accessories. No Icoms $75.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $650.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $250.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $25.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $20.00 I have several of these.
Yaesu FT50r Dual band HT in the box with manual and charger. With these accessories
drop in charger, 4 5 watt batteries(Cost $186.00), 1 2 watt battery, 2 belt clips $250.00
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $30.00 ea.

GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00
GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface. (found one)
TQ2310 suitcase programmer if I can trade above items for it.
Dual band mobile ham radio's.
Cash also works
Dean

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht
2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr of
listening to the local repeater. I have the original box, packing and owners
manual along with the ac charger and a custom leather case, and a speaker
mic that I will include in this auction. Has seen little use, mostly during
field day. I am selling to upgrade to the new APRS handheld, as I enjoy that
aspect of the hobby more theses days. The unit is used but clean, small
marks on the original antenna where the speaker mic was clipped for storage,
but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks
scale, and a 10 for opperation. As with any used gear I will not accept any
returns or refunds, and this unit is sold without any warranty, but I will
state that this unit is fully functional on my desk as I place this auction
listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted
bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it

protects you against fraud, but will accept money order / certified bank drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders Only. I reserve the right to offer to sell to the next highest bidder if the winner has unexceptable bad feedback Rating.

On Feb-22-01 at 20:06:53 PST, seller added the following information:

I accept PayPal, the #1 payment service in online auctions!

Is anyone using a KLV amplifier? I am considering one for my mobile for
use with an Icom 706 MIIg. Any experience or advice about the unit,
installation, or interface with the rig?

Thanks,
Sam

 Sam,
  This guy who is selling these amps is a CBer,
   if you check out his post you will see the FIRST time he posted
these amps for sale was on the CB news group. they are NOT type
accepted and cheap made junk.Also you will be supporting a person who
has no regard for our hobby by selling this junk that has no spectural

purity what so ever.My opinion is steer clear.
     Donnie

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht
2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr of
listening to the local repeater. I have the original box, packing and owners
manual along with the ac charger and a custom leather case, and a speaker
mic that I will include in this auction. Has seen little use, mostly during
field day. I am selling to upgrade to the new APRS handheld, as I enjoy that
aspect of the hobby more theses days. The unit is used but clean, small
marks on the original antenna where the speaker mic was clipped for storage,
but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks
scale, and a 10 for opperation. As with any used gear I will not accept any
returns or refunds, and this unit is sold without any warranty, but I will
state that this unit is fully functional on my desk as I place this auction

listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it protects you against fraud, but will accept money order / certified bank drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders Only. I reserve the right to offer to sell to the next highest bidder if the winner has unexceptable bad feedback Rating.

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht
2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr of
listening to the local repeater. I have the original box, packing and owners
manual along with the ac charger and a custom leather case, and a speaker
mic that I will include in this auction. Has seen little use, mostly during
field day. I am selling to upgrade to the new APRS handheld, as I enjoy that
aspect of the hobby more theses days. The unit is used but clean, small
marks on the original antenna where the speaker mic was clipped for storage,
but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks
scale, and a 10 for opperation. As with any used gear I will not accept any
returns or refunds, and this unit is sold without any warranty, but I will
state that this unit is fully functional on my desk as I place this auction
listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted
bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it
protects you against fraud, but will accept money order / certified bank
drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders
Only. I reserve the right to offer to sell to the next highest bidder if the
winner has unexceptable bad feedback Rating.

What do you mean "As with any used gear I will not accept any returns or
refunds,".

Since you apparently don't know the difference between For Sale and For
Auction, little else you have to say has no meaning.....

On Feb-22-01 at 20:06:53 PST, seller added the following information:

I accept PayPal, the #1 payment service in online auctions!

On Feb-27-01 at 18:35:50 PST, seller added the following information:
Here is a link to the specs as per some peoples request for more specs on
this unit : http://www.maha-comm.com/rexon/rl501/index.htm Just cut and
paste in to the address line and all will be provided the information you
request. By the way the 800mhz mod/out of band mod has completed.

Ebate, I love ebate, swapbate .

How much do you want for the 2meter radio.

Thank you

I have up for auction on eBay:

Vintage Manuals on CD - 3 cd set of hundreds of rigs, rcvrs, xmitters
from years past. Full and partial manuals, schematics, images. Also a
directory of several rig mods. $9.95 plus shipping

Hallicrafters Manuals on CD - Large compilation of old Hallicrafters
rigs. Currently 89 models included. (Single CD) $8.95 plus shipping

Drake Manuals on CD - Compilation of old Drake gear covering 41
different models. (Single CD) $8.95 plus shipping

Constantly being updated and added to when new material becomes
available. You can buy direct by simply emailing me or bid on them on
eBay and use the "Buy it Now" feature. Checks, MO or PayPal accepted.

Click on this link to see my listing on eBay:
http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?MfcISAPICommand=ViewListedItems&userid=tje@usol.com&include=0&since=-1&sort=2&rows=200

Yaesu FT-6200 mobil 440/1.2Ghz dual bander. Excellent worker in good
condition. Has scratches on case but front panel is like new. Can be
remoted. Comes with original box and manual. Asking $500 but will
consider a trade for FT-8100R.
I like this radio but have lost the need to use 1.2 Ghz. Call if
interested or e-mail me.

Will also consider an HF amplifier or Heathkit AM gear (ie. DX 100, DX
60, etc) in trade.

Okay here is my problem. Just purchased the Radio Shack through the glass
antenna. The "Glue" did'nt hold. What can I do now?! The only part of the
antenna connection that is solid is the outside, no problem with that "glue"
its on the glass with no problem, however the inside of the truck I can't
get it to stick! What can I use that will keep it together, please help!
Reply directly since I most likely wont be checking until next weekend.
Email ngwd@flash.net

73 Daniel KC4OXP

Winder, Georgia

P.S. On another topic, I do have a Larson Mag Mount, a 2000 Toyota PreRunner, does anyone know (without drilling a hole) how I can get the coax into the truck without drilling? Thanks!

I suspect that the surface of the glass MIGHT be a little curved? The one

lucky part for you is that Radio-Shack WILL take it back, just tell them it
didn't fit your needs :) Eddie

For sale: Terminal Boards - great for homebrewing, repairs etc.

Brand new terminal boards with turrets -
with two rows of 5, total of 10 terminals, on a 1.25" X 0.75" board
with 4 mounting holes.

Also larger ones available:

2.5" X 2.6" (about 20 available)

AND some 1.5" X 2.6"

Same - two rows of 5 turrets, and 4 mounting holes in the corners.

A few longer sticks of the 0.75"
and 1.5" boards are available. Inquire.

All have two rows of 5 turrets and four mounting holes
Pictures available

Most are bakelite/phenolic, and a few are fibreglas.

$1.00 each - Stock up! These are perfect for building tube receivers

and transmitters or for repairing/building guitar amplifiers and hi-fi audio amplifiers! Just $1.00 each plus shipping

I have teminal board pictures on a web page

http://home.cfl.rr.com/happysurfer/boards.htm

As you will see there are several different sizes available.

Remove the 'NO SPAM" to e-mail me.

Almost all sold out. The last few are now pictured on the web page
below.

For sale: Terminal Boards - great for homebrewing, repairs etc.

Brand new terminal boards with turrets -
with two rows of 5, total of 10 terminals,
with 4 mounting holes.

Most are bakelite/phenolic, and a few are fibreglas.

$1.00 each - Stock up! These are perfect for building tube receivers
and transmitters or for repairing/building guitar amplifiers and hi-fi
audio amplifiers! Just $1.00 each plus shipping

I have teminal board pictures on a web page

http://home.cfl.rr.com/happysurfer/boards.htm

As you will see there are several different sizes available.

Remove the 'NO SPAM" to e-mail me.

Dan Beckstrom who has a message that is current on this newsgroup is a good guy.

He still has a 20 amp metered Astron power supply left too, if I'm not mistaken. Check it out.

I am new to all the different radios out there.
I have owned and used CB's for use but lost on this.

I am a member of the volunteer fire department and the officers have
radios in the cars and that they carry to talk to people in the field and on
the way to the scene I know the frequency (154.3250) what do I need to buy
to be able to talk back to them.we each have little fire pagers that we hear
them on but the officers have the radios to talk to us, and they said they
wish we all had them. there is a repeater about 4 miles from the station.
what kind of radio and were can I get it to talk to them doesn't have to be
the best because it is all local I guess.

thanks,
Joel Thomas

Be sure to clean the glass with alcohol before trying to glue to it. Inside
windows build up a "film" that can keep the glue from sticking properly. If
you're a smoker, I'd say this is particularly important.

I have two 2 meter modules for the Kenwood TM742 series of FM transceivers.
I will be willing to trade both for a 220 module and/or 6 meter module. I

am using the rig as a repeater and need another 220 module.

Winter is almost over and this is the time to build that backup repeater or
start that repeater project you been wanting to. I have several radios just
waiting to become repeaters.
Master 2 UHF 75 watt Mobile (No Icoms) MC65KKG88B Painted handle
Drawer unit only $75.00 with cable, head, mic, and speaker $100.00
Motorola Micor 110 watt VHF with channel elements drawer only $30.00 with
accessories $45.00
For all the people who do not have time to build a repeater here is a
complete 1.
GE Master 2 factory repeater station UHF 40 watt in deskmate 44" cabinet.
No duplexer but has GE power supply. $600.00
Trades are welcome
Shipping paid by buyer.
Looking for ham radio equipment. GE programming supplies, and old military
rifles before WW2
Dean

I purchased (used) a RF concepts 2M amp (45in-160out) rfc 2-417.

I used it with a yeasu dual band (VHF/UHF) but it seems to be
attenuating the UHF receive considerably.

Has anyone one else experienced this, is it normal ? is there a fix ?

This is VERY normal - it is exactly how this amp is designed. Most 2M amps include band-pass or low-pass filtering to prevent radiation of harmonics. Newer 2M amplifiers may switch out the filtering on receive, but you can't be sure unless you ask a TECHNICAL person at the manufacturer, check the schematics carefully, or check the amp yourself. There are now some dual-band amplifiers on the market which, obviously, avoid this problem.

Your alternatives are:
1) Live with it
2) Get a different amplifier
3) Use a splitter to separate the VHF and UHF transmission line and antennas.

I have the new Ham's Net auction up and running. I could use some help from you guys that have stuff to sell. There is no charge for using the auction so your not out anything if it doesn't sell. The auction has most of the same features of the big auctions and you can still use the third party escrow services if you want.

http://www.hamsnet.net/auction/

Thanks for any help you can give.

CLIMBING BELT FOR SALE

I have a complete ready to use "medium" size (32 to 44) climbing belt with tool pouch
for sale. It is used but in very good condition.

This is not the leather type which are no longer used for safety reasons.

Price: $65.00 PLUS shipping from 29609.

Many thanks for reading.

GE MP-A VHF 146.-174. 160 channels Aegis digital encryption w/ battery and charger 9-9.5 condition. works great I use it daily. $375.00
GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE Monogram SP2550 VHF ex CSX radio with battery and charger $125.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
GE MPI 2 UHF 2 watt 2 channel programmable radio. I have 3 of these all programmed to the same GMRS split and talk around. all have chargers and good batteries. $65.00 each or $55.00 each for all 3.
Vertex VX500 UHF 32 channel scan with battery and charger. $200.00
GE Master 2 UHF 75 watt. with pre-amp and all accessories. No Icoms $125.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $700.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $200.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $20.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $20.00 I have several of these.
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $25.00 ea.
GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00

GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Motorola thruline wattmeter with 5 watt 500 - 1000 MHz element $60.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
Ritron Responder Repeater. With service manual, mic, and power cord. 10 watts out with built in duplexer, needs no power supply uses 110 AC on 462.700 $375.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface.
TQ2310 suitcase programmer if I can trade above items for it.
Dual band mobile ham radio's. UHF mobile ham radio's
Cash also works
Dean

I have a amost new 756 I have used it for 15 minutes on 6 meters. I bought the radio and then my wife passed so I don't have the time to learn the code it has a sm-6 microphone sp-21 speaker and a fl-223 filter in it.
I really like the radio but don't have the time to put into the hobby right now. I would like to get around $1500 for the package.
thanks
Harold

Hi there.

HOW ABOUT a LINK to the NEW CRYSTALS swapping BBS?

There is a NEW Crystal Exchange Message Board (free) on the
web at:

http://senac.com/boards/880/

There you can post sale & want ads and find radio crystals for sale
by others!

Sell your excess crystals there!!

The previous old message board was being ruined by Taiwanese
infiltrators that ruined it with off-topic SPAM ads. This one is
secure.

The above is all hobbyist and non-commercial. OK, the BBS has
sponsor ads, that is how we get it free.

I have concentrated all of my HAM LINKS
efforts over the past few years to editing the Open Directory
system, and I am the editor for all of the Ham Radio
BOATANCHORS links on there.

I like the robot that automatically removes any bad links for me!

We have a broad variety of specialty links to over 700 sites
(arranged by category) of interest to hams who enjoy antique rigs.

Please also link to:

http://dmoz.org/Recreation/Amateur_Radio/Boatanchors/

Photocopy of manual for HP182 Mainframe

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1208436517
This is an original manual (not a photocopy) for operation, maintenance and repair of a HP 8558B spectrum analyzer plug in.

Both manuals are in excellent order.

Quite hard to find.
Thanks
Ted

This is a new state of the art system giving you the capabilities of
receiving all those hard to find transmissions from the Military Satellites.
All you need is your scanner.

Need something to power that big linear amp you just built?

5600VAC, no center tap, 208/220V input, CCS duty 6KVA. refillable
oil type from big fm transmitter (you may want to change to a
newer kind of oil, it's a few years old..hehe) seriously,
nonflammable 'turbine oil' works well in these..

Make offer, located in Dallas Texas. 300 LBS.

ICOM PCR-1000 Computer Controlled All Mode Receiver

I am an individual selling my own personal property, no resales or returned items or dubious origin to worry about.

This radio is in excellent condition, virtually new and in the original box, purchased new last september. It has been used a total of about 10 times, I just don't have the time or the location to use it otherwise I would keep it myself. It is very flexible as it is controlled by your computer. There are even third party programs that can be used with it to gain more functionality as well as an active email list of users.

Specifications:

- Wideband Coverage:100 kHz - 1.3 GHz*
- All Mode: AM, FM, WFM, SSB, CW
- Tunable Bandpass Filters for VHF/UHF bands
- Unlimited Number of Memory Channels
- Digital Auto Frequency Control (AFC) Circuit to compensate for frequency drift in FM mode
- Auto Mode Function: you input a frequency, the IC-PCR1000 selects the correct mode
- Real-Time Bandscope
- IF Shift
- Voice Scan Control (VSC) Function
- High Performance PLL Circuit
- S-Meter Squelch
- Large Selection of Tuning Steps Available
- Noise Blanker
- A Variety of Scans
- Tone Squelch
- Optional UT-106 DSP
- RF Attenuator (20 dB)

Automatic Gain Control (AGC) Function for SSB, CW and AM Modes
External Speaker Level Converter

Includes:

IC-PCR1000 Communications Receiver
Software
Telescoping Antenna and Cable Lead
RS-232C 6-pin cable
120 V AC adapter
Operators Manual
Original Box and Packaging

ICOM Q7A 2 Meter/440 MHz Dual Dand Ultra Compact HT

I am an individual selling my own personal property, no resales or
returned items or dubious origin to worry about.

This radio is in excellent condition, virtually new and in the original box. I have used it about three times since I have several other dual bands I use more often. I just never took the time to learn the commands to use it, I still prefer my large but functional Z1A. My loss is your gain thought since this is a current model and in perfect condition.

Specifications:

- Dimensions: 2.3 (W), 3.75 (H), 1.1 (D) inches, 6 oz (0.375 lb)
- TX: 144-148 MHz and 440-450 MHz triple conversion
- RX: 30 - 1300 MHz (cellular blocked on U.S. model)
- Output power: 350 mW (VHF) 300 mW (UHF)
- 200 memory channels
- Superior audio in its class. Large speaker (36 mm / 1.406 in) for 100 mW audio output
- CTCSS tone encoder/decoder with pocket beep
- ICOM rugged! Meets MIL SPEC C/D/E for shock and vibration
- Easy to use - only 7 buttons (including power) and a large, easy to grasp tuning dial
- Auto repeater function
- Channel operation
- Tone scan
- 10 tuning steps
- Easy reverse
- Dual watch
- RIT function
- Auto power OFF
- Power saver
- Manually or automatically controlled LCD backlighting for easy night peration

Includes:

- Q7a Dual Band HT
- Manual
- Antenna
- Belt clip
- Hand strap
- 2 AA size Ni-Cd batteries
- Ni-Cd charger
- Original Box and Packaging

Extras:

- OPC-782 PLUG ADAPTER CABLE: Allows connection between a transceiver and speaker-microphone, headset, etc.

Hi folks,

I saw some traffic at the Ham's Net Auction from the last posting but it didn't last long. I would just like to invite anyone who has not been there to check out http://www.hamsnet.net/auction/ The auction is free so please help me get this thing rolling by posting some items and bidding on the items that are there. At the moment I need postings.

I am trying to make a common place for hams to buy and sell their equipment online. Although the auction is a new addition to Ham's Net, I have been running the server for the past two years. I have been hosting free e-mail accounts and website hosting for hams only so this is by no means fly by night.

If you are curious about what Ham's Net is, take some time to check it out at http://www.hamsnet.net/

Thanks for your help

This radio tunes from 2 to 29.999 MHz USB-AM-CW-FSK using 6-decade
mechanical switiches in 0.1 KHz increments plus vernier (vernier only for
receive). Exciter output 100 MW. Controls for Service Selector, PA Load,
Squelch, Noise Blanker, BFO, and other audio functions.
Amplifier boosts 100 MW output from RT to 200 W AM or 400 W PEP. Controls
for ANT TUNE and LOAD, 50 ohm line, Test Meter Function and system ON-OFF.
Set includes RT, Amp, connector, and hand mike. Operates on 24 VDC.

Can be found in the "Boneyard Bluebook" for $1650.00 but I will consider all
offers. Would like to sell as a package but will seperate RT from amp if
you need it that way. Located in Houston TX. Buyer will be responsible for
shipping. E-mail with any questions.

WANTED

A reasonably priced CRANK UP and TILT OVER TOWER at least 40 feet tall.
Needs to be in good serviceable condition. Will buy out right or do some
trading. I do NOT need a standard stacked tower; it must be crank up and
tilt over.

Will pick up in the area of the Carolinas, GA, or TN. I am not looking for a
fancy expensive tower, just one good enough to support a small beam or quad.
If you have a rotor to go with it, let me know.

Many thanks for reading.

WANTED

A reasonably priced CRANK UP and TILT OVER TOWER at least 40 feet tall. Needs to be in good serviceable condition. Will buy out right or do some trading.

I do NOT need a standard stacked tower; it must be crank up AND pedestal tilt over.

Will pick up in the area of the Carolinas, GA, or TN. I am not looking for a fancy expensive tower, just one good enough to support a small beam or quad.

If you have a rotor to go with it, let me know.

Many thanks for reading.

Happy Holidays

Will trade 7-pin type for a 9-pin tv tuner socket extender. If you don't
need a 7-pin I will buy the 9-pin type.
Thank you
Greg

I have a 55 foot crank up with a pivid base.   Also included is a 2.25 inch
thick base plate to attack to three 1 inch concrete bolts. This plate allow the
tower to be set exactly plumb.   I bought it a couple of years ago to install,
but had zoning and neighbor problems. So I never used it.

I will take $500 for it, you pick up, its in Columbus, OH   not NC or TN.
The $500 is much less than I paid, but I don't need it and you want one that is
affordable.   Please let me know if you have any interest at this distance.

160 to 2m radio. Works fine and is a 9+ in appearance. Includes 2
power cables, handheld mic, a Inrad 400 Hz filter in the second IF,
CT-17 communication interface converter, original manual, and original
box with packing inserts.

I'm selling the unit because I bought a Ten-Tec Pegasus and I don't
operate 6 or 2 m.

Asking $1100. 73's de KE9RQ

Looking for the operational manual for a Philips AL990 communications
portable receiver. A service manual would be a big plus as well. Will be
willing to pay copy fees and shipping. Thanks in advance, Picture of
radio is shown below!

Hi All,
If anyone is interested in purchasing a wide RX, dual-band, amateur radio, I have put my FT-90 up for auction. The radio is in great shape and comes with the YSK-90 ($69.00 if purchased new from HRO) original box, mounting hardware, and owner's manual. Check it out; it's very small and quite a cool radio.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1203966334

Thanks,

Greg R

For Sale: Just in from a surplus auction, the following pagers:

Advisor (A04KLC5162AA) Qty: 20

Bravo (A04QAC5962CA) Qty: 40
Bravo (A04JRC5661CA) Qty: 15
Ultra Express (A04HNC5961AA) Qty: 13
Memo Express (A04PHC5962AA) Qty: 10
(All models above are listed as Intrinsically Safe/Medical Radiation Safe. I believe they came from a hospital. Frequency listed is 413.4250MHz).

Spirit (A03JVC2468AC) Qty:4 (148.775MHz)

Pagers are being sold "as-is" and untested. Some are obviously not working, but the majority are cosmetically 8+/10. Would like to sell all as one lot. Please advise if interested. Thanks!

Steve

Still Looking for the operational manual for a Philips AL990
communications
portable receiver. A service manual would be a big plus as well. Will be
willing to pay copy fees and shipping or I may have some literature you
need? Thanks in advance, Picture of
radio is shown below! email me directly at rlonn@home.com

For sale, Philips 15MHz dual-trace oscilloscope model PM 3226. It
includes the service manual.

This scope is old (the service manual is copyright 1975), but still
works. It weighs 11 pounds and is 12" wide x 5" tall by 13" deep.
If you can't pick it up from Sunnyvale, CA, you'll have to pay for
shipping.

The price is $100, but I have no idea what it's worth, so I'll take
the best offer.

Great tool - hand held, self contained, easy to carry with you and SIMPLE to
operate. Works amazingly well and will work on multi-layer PCBs.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1204848872

This tool normally costs around $400 new and is on EBay at $75 with no

reserve. It will sell for whatever the highest bid is. Brand new in the box with warranty card and manual.

Thanks
Lance (Yes, I'm selling it - I figured you guys might be interested.)

Still Looking for the operational manual for a Philips AL990
communications portable receiver. A service manual would be a big plus
as well. Will be willing to pay copy fees and shipping or I may have
some literature you
need? Thanks in advance, Picture of radio is shown below! email me
directly at rlonn@home.com

Not going to get much radio for a 486's.

Good luck

Barry D.

CLIMBING BELT FOR SALE

I have a complete ready to use "medium" size (32 to 44) climbing belt with tool pouch
for sale. It is used but in very good condition.

This is not the leather type which are no longer used for safety reasons.

Price: $65.00 PLUS shipping from 29609.

Many thanks for reading.

GE MP-A VHF 146.-174. 160 channels Aegis digital encryption w/ battery and charger 9-9.5 condition. works great I use it daily. $375.00
GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE Monogram SP2550 VHF ex CSX radio with battery and charger $100.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
Vertex VX500 UHF 32 channel scan with battery and charger. $185.00
GE Master 2 UHF 75 watt. with pre-amp no accessories. No Icoms $75.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $650.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $250.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $25.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $20.00 I have several of these.
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $25.00 ea.
GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00
GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with

a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface.
TQ2310 suitcase programmer if I can trade above items for it.
Dual band mobile ham radio's.
Cash also works
Dean

Hi

Looking for a manual or schematic for an ITT-Mackay MSR-4020 antenna coupler.

Unit is approximately 9" x 12" x 6". Has internal roller inductor and vacuum variable both of which are servo driven. Runs on 28 Vdc.

Does this sound familiar?

Thanks

Colin

I am testing some new auction software on the Ham's Net server. If this works out It will be a regular feature on Ham's Net. There is no charge for the auction so go post your items. It would also be a big help to kick things off.

John, if this is the same transmitter you've been hawking for the past
two months, maybe you should try some other outlet. I won't mention
any names, but it rhymes with "Ebay". Just a suggestion.

Neil

It is actually a darn good rig at a good price.

Personally I'd take it, but with four HF rigs already, married thirty years,
I'll pass. It isn't worth a divorce.

gee thanks Neil, I would have never thought of that, but since there is so
much
crying and whining about ebay ruining the used market I thought I would keep
on trying here.

It doesn't always pay to listen to people who cry and whine a lot.

In fact, it hardly EVER pays to listen to them.

This CDROM contains over 6GB of compressed data related to 2-Way, CB, SW & Ham Radios. This CD does not include any RSS software for programming radios, but it does tell you where you can get them free on the internet and other various sources. This CD has a wealth of information, as well as an enormous amount of links where to get specific information you may be looking for.

The PDF files in the root directory contain an extremely large amount of Mods, Diagrams, Pictures, Links, etc, from all over the world.

This information includes:

5,000+ Mods
3,000+ Pictures
4,000+ Diagrams & Schematics
2,000+ Pinouts, Cloning & Programming Cables

ADI, AEA, Alinco, Allied, AOR, Azden, Bearcat, Clegg, Collins, Drake, GE, Grundig, Gonset, Hallicrafters, Hammarlund, Heathkit, Icom, JPS, Johnson, JRC, Kantronics, Kenwood, Lafayette, MFJ, Motorola, National, Paccom, Panasonic, Ramsey, Ranger, RCA, Realistic, Regency, Sangean, Sony, Standard, Swan, Tandy, TAPR, TenTec, Uniden, Yaesu, Yupiteru, Zenith, plus much, much more....

I have 13 copies available.

All this for $49.00, Free Shipping in USA. ($5 shipping elsewhere)

Send Paypal, Billpoint or Money Order (no checks) To:

I would suggest that hams on this news group use bogus e-bay accounts to bid up items and then say that they change there mind and do not want the item. This can be done buy getting a free internet acccount. This way when you get kicked of e-bay for non paying bids you can get more e-bay accounts under differant names.

NO E-BAY

I have a Jewell Set Analyzer for auction on ebay. Not only is it in
wonderful condition, even the velvet
liner looks great! It also WORKS!! Good for taking measurements on
old tube rigs, take a look and
see if you're interested.

here is the link:

READ THIS NOW AND GET MONEY FAST!!!

EVERYONE NEEDS TO READ THIS!!! If you need
money read this VERY
CAREFULLY!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

SERIOUSLY NO SCAMS! LOTS OF CASH, FAST AND COMPLETELY LEGAL, THIS REALLY WORKS!! THIS REALLY CAN MAKE YOU EASY MONEY!! IT WORKS!!! BUT YOU HAVE TO FOLLOW IT TO A LETTER FOR
IT TO WORK!!!!

A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought,"
Yeah, right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at
#6, and post the article in at least 200 newsgroups. (There are thousands)
No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured what have I got to lose except 6 stamps and $6.00, right? Like
most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Then I invested the measly $6.00. Well GUESS
WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00!
In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps. Let me tell you how this works and most importantly, why it works....also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it.

STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00 bills and

place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope to prevent thievery. Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service by this. THIS IS ABSOLUTELY LEGAL! Mail the 6 envelopes to the following addresses:
#1) Alice, 3204 SW Mitchell Ct., Portland, OR 97201
#2) Ike, 2900 Canby Ct., Northfield, MN 55057
#3) D. Gerow, P.O. Box 579574 Modesto, CA 95357-9574
#4) James Hart, 5003 Raffee Cove Austin, TX 78731
#5) A. Newmeyer, 1135 Michigan Ave. Apt B-20, East Lansing, MI 48823
#6) Sally Rutherford, 67 Afton Cres. Maple, Ont. L6A-1H5 (Canada)

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make!

DIRECTIONS ---HOW TO POST TO NEWSGROUPS----

Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your
cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computers memory.

Step 2) Open a blank "notepad" file under accessories in windows and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list.

Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to.

Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.)

Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one!

Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to

use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.**

Now the WHY part: Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is, do you realize that thousands of people all over the world are joining the internet and reading these articles everyday, JUST LIKE YOU are now!! So can you afford $6.00 and see if it really works?? I think so... People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet. Remember, play FAIRLY and HONESTLY and this will work. Thanks for participating!!!!!!!

GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE MPD VHF 48 channel alpha display with battery and charger. a 9 $125.00
GE PCS I have several VHF and UHF all 2 channel with batteries no chargers $50.00 each
GE Monogram SP2550 VHF ex CSX radio with battery and charger $125.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
GE MPI 2 UHF 2 watt 2 channel programmable radio. I have 3 of these all programmed to the same GMRS split and talk around. all have chargers and good batteries. $65.00 each or $55.00 each for all 3.
Vertex VX500 UHF 32 channel scan with battery and charger. $200.00
GE Master 2 UHF 75 watt. with pre-amp and all accessories. No Icoms $125.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $750.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $300.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $25.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $25.00 I have several of these.
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $25.00 ea.
GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00
GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Motorola thruline wattmeter with 5 watt 500 - 1000 MHz element $65.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface.
TQ2310 suitcase programmer if I can trade above items for it.
Dual band mobile ham radio's. UHF mobile ham radio's
Cash also works
Dean

I need the front panel(the control panel) for an Icom 2710. Mine was stolen
this weekend! They only got the panel, not the radio. I can order one from

Icom, but thought I would start here.
Thanks,
Richard

All:

I have decided to sell a computer that I originally purchased for my wife.
The machine is a Toshiba Tecra 550CDT. It has a 266Mhz processor, 96MB RAM,
4GB hard disk, USB, 20X CD, 56K modem) see here for exact spec -
http://cdgenp01.csd.toshiba.com/content/product/pdf_files/detailed_specs/tec
ra_550cdt.pdf

I will be asking $390.00 plus shipping. This is exactly what I paid for it 8
months ago. I would prefer to sell it here on the west coast or even in
norther calafornia to avoid shipping. However, I will ship it if needed. The
computer is is really good condition and has not been used mobile. It come
with Windows 95B but no other software due to licencing restrictions.

Please email me at

brumey@subdimension.com

Kevin (KD6QFO)

Swivel Bely Clips for your VX-5R! Only $4.50 plus shipping.

Just like the Cell Phone swivel clips selling for $20+, these unique swivel clips have the "button" that attaches to the radio using the OEM clip screw, and strong 3M double backed adhesive. This "button" clicks securely into the strong belt clip, and releases only when you push on the release lever. Comes with two (2) "buttons" and one belt clip. "Buttons" have break-off tabs that fit the VX-5R back perfectly.

Only $4.50 plus shipping.

Steve KC6IJM

WANTED

A reasonably priced CRANK UP and TILT OVER TOWER at least 40 feet tall.
Needs to be in good serviceable condition. Will buy out right or do some
trading. I do NOT need a standard stacked tower; it must be crank up and
tilt over.

Will pick up in the area of the Carolinas, GA, or TN. I am not looking for a
fancy expensive tower, just one good enough to support a small beam or quad.
If you have a rotor to go with it, let me know.

Many thanks for reading.

Happy Holidays

Hi all,
looking for the bottom section (#8) for a Delhi medium duty, or heavy duty
self-supporting tower.
If you have one that you'd like to part with please email me with asking
price.

I Have For Sale A Nice Clean Hallicrafters HT-33B Amplifier. Works Well.
Used Very Little. Runs A PL 172 (8295 Eimac).

With Manual (Aftermarket Nice Factory Laminated)

Pictures Available.

This Is The Good One With The Bow-Tie Type Band Selector Knob & Dual Meters

I Would Be Willing To Trade For A Continous Coverage HF Rig With Auto Tuner
That Can Be Computer Interfaceable.

You Have To Ship Or I Could Meet You Somewhere Within Reason. (Houston Area)

Gregg E. ....W5IDX .http://home.att.net/~gregg.e/index.htm

Good Day - For Sale a Gonset SUPER SIX mobile converter. This is a tunable tube converter that covered 10, 11, 15, 19, 20, 40, 49, and 75 meters when operated into the car's radio. Got its power from the car radio and was great for AM operation. Was very popular in the mid and later 1950s.

Unable to try so sold as is. Looks complete and all the controls operate freely. But has a couple scratches on the gray box and a cracked knob.. The extruded aluminum case is good but has a couple small dents that can easily be repaired.

Manual and drawing is on BAMA

$35 plus postage from zip 98837.

Stupid frigging spammer!!!

Do not trust or do business with this
person . They have SPAMMED
the NG with their eBay Drivel without
inserting FA = For Auction in subject
line so those of us that do not enjoy
auctions can filter said "spam mail"
Is this Florida For Sale OR For Auction.

P.S. For the Profanity Police.
"Frigging" IS A Nautical term..

Just my opinion..

Bob

Help. I need a copy of Hamshack that Kenwood had out in the early 90's.
It was Hamshack Version 2.2. I need a copy that works. I have the demo
copy. It is a rig control program for the TS-440 Thanks.

I want to buy a Ten Tec model 229 antenna tuner.
Looking for one that works and looks good.

Want to Trade: Bendix King UHF, 210 channel, alphanumeric LCD display, 4-watt handheld, excellent condition for like condition Yaesu VX-5R.

Also have other Motorola GP300, HT-1000 VHF radios that I would consider instead of the Bendix King.

Thanks for your consideration!

30 foot long 13 conductor cable assemblies manufactured by Precision
Cable.We offer these primarily for the cable they contain.

Triply shielded mil spec cable available in three and ten conductor
versions.

I am interested in buying an inexpensive 1750 meter transmitter and or beacon.Homebrew is ok and may be tube or solid state.
I am disabled with a neuro-muscular disease so it can not be a kit because I am unable to solder small components any longer.Price is also a concern due to fixed income so if you have anything you think I might be able to use please e-mail me with details and price.

I just discovered a whole box full of BC-610 coils, that I had forgotten, in my old storage shed.

I'd have to count them, but I think there are maybe 8 to 12. At least two are in the original sealed boxes. I know that there is some duplication as well.

Any one interested?
make an offer??

Thanks to all those who responded.
I ended up with a real pile of e-mail...Didn't think there was that much
interest in a "real" boat anchor <:-))

I'll try and get back to all within a day or two.

I'm in the midst of some serious tower work with only one other helping
me...He pulls the rope to the gin pole <:-))

I think the antennas start up tomorrow.

I have a 3 week old Yaesu FT847. I took a lighting hit a month or so
back and bought this a replacement rig for a Icom 820. I have found
another 820 and decided to sale this rig. I paid $1500 and will take
1200, I am firm on this price. I will ship anywhere in the USA for this
price

Remove the .nospam before replying.

The following is documentation and software NOT hardware. All is offered in good faith and believed to be correct and accurate.There is adequate detail to construct several of the programmer hardware interfaces from this documentation but this is not for the beginner.

Maxon Service documentation and software :

SD125 VHF & UHF Data Radios
- Full service manual
- Programming software
- Drawings for programmer cables
- Drawings for programmer interface to PC

SP130 & SP140
- Full service manual
- Programming software

MM6854 Dual Band GSM Modem
- Full service manual
- Command summary

PM160 & PM100
- Full service Manual
- DSM99 group programmer software
- PM160 VHF & UHF programming software

SM2000 (PM100)
- Full service manual
- Programming software

SP110
- Programming software

Misc. programming software and manual for the following radios:
- SP-2150, 2350 and 2450
- SP-2550 and 2850 series
- SPX-2550 and 2580 series
- SL-70W
- SM-4150
- SP-120, 130 and 140
- Pioneer VHF, 220 and UHF - very little information about this unit.

Drawings of programming adaptors (documents):
- ACC 2000 (for SD125)
- QPA 4000
- BP 4000

Thomas Edison describes in his patent application for the wireless telegraph
in May of 1885 as follows;
For receiving signals I locate in said circuit between condensing surface
and the ground a diaphragm sounder which is preferably one of my electro
motograph telephone receivers.

The first wireless telegraph picked up the telegraph signals with a loud
speaking telephone. De Forest patented his triode in 1907 twenty two years
later. For his first radio he used an Edison loud speaking telephone.

Edison's Patent and an essay about wireless transmission can be seen on my
site at www.geocities.com/starapex Click on the radio

Cheers
Ken McKenzie

I have a Collins 32V-2 with original manual which I would like to trade for
a Hallicrafters SX-28A receiver. May also consider a Hallicrafters HT-32B
transmitter.

DRAKE SW8 COMMUNICATIONS RECEIVER & in EXCELLENT + condition.
This radio is thought to be the best performing and sounding transportable shortwave receiver on the current market.
Its ergonomics are fantastic and the three (3) standard filters are all high quality.
This receiver comes with the manual and the AC adapter.
This great receiver.

The radio is a general coverage receiver that covers from 100 Khz to 30,000 Khz continually covering LW (longwave), MW (middle wave - AM) and SW (shortwave), 87 - 108 FM (STEREO through the headphone jack and 118 - 137 AIRCRAFT band. Modes are AM/USB/LSB/CW/FM/SYNCHRONOUS DETECTION standard. Digital PLL synthesized tuning via a keypad, up and down buttons or a large tuning knob. The AM selectivity filters are 2.3 / 4.0 / 6.0 and are selectable in all modes except FM which has it's own 12 khz selectivity filter.

TECHNICAL INFORMATION: Alphanumeric liquid crystal display provides for display of station frequency, Direct entry of mode and bandwidth selection

via keypad, Selectable sideband, synchronous AM detector for improved quality of received AM signals, especially under severe fading conditions, Internal "D" cell batteries or AC wall transformer operation, High Dynamic Range allows for detection of weak signals in the presence of strong signals, Outstanding Audio Quality - the hallmark of a Drake receiver, FM Stereo with headphone operation, Extensive panel display of operating parameters including operating mode and band, Scanning capability by memory, 70 programmable channel memories stored in non-volatile memory, Dual time zone clocks, Dual programmable timers, Auto Backlight shutoff to conserve battery life, Low Battery Indicator and MADE IN THE USA .

Money Orders Please, No Personal Checks $495.95 + $14.95 Shipping/Insurance/Packing for domestic US shipment. All used electronics are sold as-is but guaranteed not to be DOA

IC-735 with 500 Hz CW filter and including Icom SM-6 desk mic (about
$100 value). Excellent condition -- plastic door intact! Manual
included. Very clean, some wear on top, but no scratches. Asking $550
plus shipping. Radio alone (no microphone) for $500 plus shipping.

Please email to my callsign at arrl.net or my callsign at
midsouth.rr.com if interested.

Pro 5 Single-sided Headsets

Pro 5 is designed to answer the many requests for a single-sided Boomset. The Pro Series Boomsets are designed to meet the high standards of the most critical Multi-Op Contester stations and DX chasers.

This Boomset allows the operator to monitor other radios during operation.

Features
Lightweight, comfortable headset
Fully flexible single-sided Boom
The ear pad is heavily stuffed and covers the entire ear
Seals out noise
Pad is removable for washing
Replacement pad available (See Accessory Page)
Specifications
Operational characteristics
Microphone works in VOX or P.T.T. modes
Boom comes equipped with your choice of Heil "Key Element" microphone cartridge (AD-1 adapter needed).

Design characteristic
Flexible material that makes mic placement virtually unlimited
Boom swivels up for travel, storage or headphone use only.
The headband has d tentes on each side for adjustment and padded for comfort.

Hard-to-find and one of the more successful of the early "modern"
oscilloscopes, both an in-demand collectible as well as a superb bench

instrument that remains eminently useful.

I have a HT750 Motorola VHF 16 Ch Radio and when I want to talk with someone
else's radio I have to reprogram, but I've been over the Motorola website
and check many sites on the web and couldn't figure out what I need. I
found Pin out diagrams for the connector, but thats really not enough. If
somebody has the software or could tell me where to get it I would greatly
appreciate it.

Darren

Greetings to all, my name is Jonathon, and I am the newly appointed
Emergency Services Communications Chairman for the Northeast Indiana
American Red Cross.
Our chapter is in need of several hand held and two mobile radios to be used
for official Red Cross disaster responses that operate on the Red Cross'
47.42 frequency. The hand held radios will be used for volunteers to keep
in contact with the Emergency Response Vehicles while moving around a
disaster effected area, as well as inter-communications within a disaster
shelter.

We also are looking for at least two mobile radios for Disaster Action Team
runners to have in their vehicles so they may communicate with ERV's and

shelters while traveling to/from a scene or shelter.

Anyone interested in helping us with a donation can please contact me at nightshifter@home.com, Byron Schutt (Emergency Services Specialist)with the NEINARC at neinarc@neinarc.com, or call either of us at (219) 484-9336 Ext 229.

* Please, include charging units for any hand held radios, if possible.

Thank you for your consideration of this request.

Jonathon Jacob

I have four 16 ch HT1000 UHF in 10/10 brand new with brand new batt. and
charger this is a buy you cant pass up. The retail is alot around 800. I
will sell them for $400 and 10 for shiping. You will love this radio and i
will program them up for you.

I also have 7, 2 ch HT1000 UHF 10/10 new with new batt and charger. $350

that includes programing

I have 7 6 ch P200 VHF radios with new batt and charger $400, that includes shiping.

  This is a ham radio newsgroup. Not many of us have equipment that can be used legally on 47.42 MHz (and even less would be willing to donate what they have since they're probably using the equipment). Try seeking donations from local companies instead.

IC-735 with 500 Hz CW filter and including Icom SM-6 desk mic (mic is
about $100 value). Excellent condition -- plastic door intact. Manual
included. Very clean, some wear on top, but no scratches. Asking $550
plus shipping. Radio alone (no microphone) for $500 plus shipping.

Will consider trade for color laptop, Pentium 233 or better, CD-ROM,
1.0GB or better hard disk, TFT color screen, 64 meg memory, modem,
PCMCIA slot, USB ports.

email to my callsign at arrl.net or my callsign at midsouth.rr.com for
prompt response. All reasonable offers considered.

Heathkit HW-16 CW Transceiver

I purchased this rig from a ham that was getting out of the hobby. I have NEVER checked the rig out myself. Item is sold AS-IS. Also included is the original owners manual. Physical condition of the rig is good. Buyer to pay all shipping and insurance. Please email me with any questions before bidding. Pictures are available at http://home.flash.net/~ngwd/ebay.htm To Bid on this item please go to http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=440560855

Icom IC-T2H 2 Meter HT

Icom IC-T2H 2 Meter HT. Excellent Condition both cosmetically and
electronically! I try to personally check out each item I list for auction,
and to describe each item completely & carefully. However, since most of
these items are used electronic pieces all items are sold "as is". Please
contact me for any further information. You may look at items that I have
for auction at my website http://home.flash.net/~ngwd/ebay.htm To Bid on
this item please go to
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=440862967

--
Every day I get up and look through the Forbes list of the
richest people in America. If I'm not there, I go to work

The next post please put FA = For Auction. That way those of
us that do not read ebay ads in the NGs will not waste our time
on your message..

The NGs title is "ham items for sale" NOT For Auction!!

Just my opinion.

Bob

Bob,

The next post please put AB = Auction Bitch. That way those of us who don't
read Auction Bitches in this NG won't waste our time on your message.

The NGs title is "ham items for sale" NOT Bitch about Auctions.

Just my opinion. :-)

Bob,

FYI, the Newsgroup Police are still taking applications, and you would make a fine officer.

Please submit yours today.

Dan

I'm sorry to all those that I offended by posting. I should have read and learned more about the newsgroup before I posted.

I have been posting messages here for the past 6 years, and suppose that it never hit me what FA was all about. Now I know. Again the mistake was mine and mine alone, It will Never happen again.

Marty, is this a ROUND 'O' connector or
a "UA" connector (One flat edge, 1"
dia, 3 gold pins in triangle).

What's a reasonable price for a cable
type female??

Beware of this auction and seller. After I won a bid for 20 feet, the seller
refused to sell me unless I buy at least 50 feet or wait such length is
available. In the auction I bid on, the seller did not place any requirement
on minimal length to purchase. I think per E-bay rule, the seller is obliged
to sell but he/she does not care.

Fantastic condition Yaesu VX-1R.If you're unaware, this is a palm-sized
dual-band handy-talkie, with 500mW TX power on batt, and I believe 1W on
DC input. Includes Radio, box, documentation, antenna,wrist-strap, Plus:

SMA-BNC Adapter
Cigarette Lighter Adapter
Leather Case

This unit is in great shape, with EXTREMELY LOW hours. Was used mainly
as a backup/emergency/throw-it-in-the-glovebox-on-long-trips radio.

Besides an interesting collectable, these are useful for wind position
and speed sensors, ham antenna position reporting, and legacy industrial
uses.
Can be run on 60 Hertz 12 volts AC if you lightly sense your outputs
with a PIC or whatever

Please see tutorials and details at

Hello,

     I have been considering on purchasing another IC-706 for my mobile, but want to upgrade to the mkIIG. The best new price I have found is Texas Towers at $999. Anyone know of a better source/price? Anyone have a nice used IC-706MkIIG at a good reasonable price?

Thanks,
Piero - N3FVG

Hello,

     I just wanted to let everyone know who may be interested, I received an e-mail from Barry Onigman <barryo@tiac.net>, who works for HRO, (unknown which branch, who stated that HRO just received a small shipment of brand new IC-706mkIIG's yesterday. If you call, ask/e-mail Barry for further details. I do not know the price, but I do know HRO will match any competitors price and Texas Towers currently has them for $999 with the Icom coupon.

Good Luck....

Subject basically says it all!

I'm looking for the original mic for the Icom IC-737 which the manual says
it's a Icom HC-36. Please email me directly at ngwd@flash.net or
kc4oxp@flash.net

I have for sale, a Icom HC-14 (which I believe went to the ICOM 706!? It has
the keypad on the back of the mic, the condition of the mic is excellent!
Best reasonable offer. email ngwd@flash.net or kc4oxp@flash.net .

FS: NorCal 40A 40-meter QRP Transceiver

The NorCal 40A is perhaps the most efficient and clean-design
single-band QRP rig made. The receiver uses only 16 ma!
This one was built by an HP electrical engineer, and modified
to work reliably from 10-15v.

     Band: 40m
     Transmitter: 2w at 13 v. Very efficient.

     Receiver: 4-xtal filter, RIT, Uses only 16 ma.

Available at www.ebay.com. Search for "norcal".
Auction ends Sunday, Aug 20.

Icom IC-735 with CW filter
IC-735 with 500 Hz CW filter and include Heil HM-10 with HC-5 element
and mic stand. Excellent condition -- plastic door intact! Very clean,
some wear on top, but no scratches. Asking $575 plus shipping. Radio
alone (no microphone) for $500 plus shipping.

For quicker response, email to my callsign @ arrl.net or my callsign
at midsouth.rr.com

Thanks for reading my message. I have re-listed my Icom IC-737, Bidding starts at $2.00.

Icom IC-737 Mint Condition, If your the winning bidder, you will receive a beautiful General Coverage Rig, Mint cosmetically as well as electronically. Built-In Antenna Tuner, No Microphone. I do have a COPY of the owner's manual.

I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". BUYER pays for all shipping and insurance.

Please contact me for any further information, other pictures are also available of this rig Contact ngwd@flash.net Visit My Website at www.flash.net/~ngwd to see this and all the other items that I'm offering for bidding!

If you would like to BID on the HF rig, please click here.

HT is in perfect condition, and DOES include manual, original box, and DOES include the optional carrying case! Only 1 Hour 30 Mins left to bid!! Pictures are available at http://www.flash.net/~ngwd Or to bid on item, please go to http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=440862967

73 Daniel KC4OXP

Questions, please email me directly at ngwd@flash.net

This information is taken directly off of the ICOM IC-T2H brochure.

General
Frequency Coverage:
Tx: 144-148 MHz; Rx: 136-174* MHz (*144 -148 MHz guaranteed)
Mode: FM
Number of memory channels: 43 (40 regular, 2 scan edges and 1 call)
Frequency stability: 10 ppm (0C to +50C)
Operating Temperature Range: -10C to +60C; +14F to +140F.
Power supply requirement (negative ground): 9.6 V DC (supplied Ni-Cd cells)
Current Drain (at 9.6 V DC):
Transmit (6.0 W): 1.6 A typical; Transmit (1.0 W): 0.7 A typical
Receive (power saved): 25 mA (typ.); (standby): 80 mA (typ.); (rated audio): 210 mA (typ.)
Antenna connector: BNC (50)
Dimensions (mm/in): 58(W) x 140.5(H) x 32(D) mm; 2.32(W) x 5.5(H) x 1.32(D) in
Weight (approx, w/antenna and battery): 420 g (14.8 oz.)

Transmitter
Output power (at 9.6 V DC): 6 W High, 1 W Low (typical)
Modulation: Variable reactance frequency modulation
Max. frequency deviation: 5.0 kHz
Spurious emissions: Less than -60 dB
External mic connector: 3-conductor, 2.5 (d) mm (1/10")/2k

Receiver
Receiver system: Double conversion superheterodyne
Intermediate frequencies:
1st: 30.85 MHz
2nd: 450 kHz
Sensitivity (typ. for 12 db SINAD): 0.14 V
Squelch sensitivity (typ. at threshold): 0.16 V
Selectivity: More than 15 kHz/-9 dB, Less than 30 kHz/-60 dB
Spurious and image rejection: 60 dB (typical) (more than -45 dB: half image point, except 2nd image)

Audio output power (at 9.6 V DC): 500 mW (typical with an 8 load)
External speaker connector: 3-conductor, 3.5 (d) mm (1/8")/8

IC-T2H Supplied Accessories
Battery case with Ni-Cd cells
Wall charger
Antenna
Belt clip

IC-T2H Options
Battery Packs and Case:
BP-194 R6 (AA) batteries x 8 (with Ni-Cd cells, 6.0 W/3.7 h). Ni-Cd cells in BP-194 must be purchased separately if battery pack is purchased separately from IC-T2H.
BP-195 9.6 V, 700 mAh (6.0 W/3.7 h)
BP-196 9.6 V, 1050 mAh (6.0 W/5.5 h)
All approx. output powers and operating times - Tx (high): Rx: Standby = 1:1:8
Desktop Chargers:

BC-119 + AD-81 Rapidly charges battery packs BP-195 or BP-196. Installed Ni-Cd cells cannot be charged via supplied BP-194 BATTERY CASE. Both AC and DC can be used to power the charger. The AD-81 must be purchased separately.
Speaker-Microphones:

HM-46 SPEAKER-MICROPHONE: Compact and lightweight. Equipped with an earphone jack.
HM-54 SPEAKER-MICROPHONE: Durable, full-sized.
HM-75A REMOTE CONTROL MICROPHONE: Allows you to remotely select memory channels, operating frequency, etc. Simple remote and normal remote are selectable.
Carrying Case:

LC-145 CARRYING CASE: Useable with any battery pack.

Wow! did you every get a bunch of p.o.'s reply's. I agree with you. We can all scan ebay if we want to see what is for auction. This is for those who want to sell outright. I like having the choice to bid or buy outright!

Thanks for you comment!

Wanted: Knob set for 3 Motorola HT-600 radios. Do you have any junker radios (water damaged, broken, dropped, etc.) that might still have good knobs? Please let me know!

Thanks for your help!

Steve KC6IJM

Heil Pro 5 Boom Micrphone Headset Purchase this Boom Microphone for my ICOM - 737 less than 2 months ago, and used less than 20 minuites. Wife purchased it for me, however I wanted the Goldline, so this microphone is up for bidding. This has the BLUE HC-5 Element. I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". Microphone DOES NOT INCLUDE THE ICOM ADAPTER. Please contact me for any further information at ngwd@flash.net To Bid On This Item, Please click here http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=443457561 Happy Bidding Good Luck!

Forthcoming family addition demands I get rid of some equipment.
Reluctantly, I offer the following:

Excellent condition IC-735 with 500 Hz CW filter and SM-6 desk mic.
Asking $550, must sell, reasonable offers considered, unreasonable
offers laughed at.

Quicker service to email me at my callsign at midsouth.rr.com or my
callsignat arrl.net

Thanks and 73 de Marty, N5NW

Icom IC-737 Mint Condition.

If your the winning bidder, you will receive a beautiful General Coverage Rig, Mint cosmetically as well as electronically. Built-In Antenna Tuner, No Microphone. I do have a COPY of the owner's manual.

I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "AS-IS".

BUYER pays a flat rate of $30.00 for shipping insurance and handling.

This rig was checked out by a local LICENSED HAM TECHNICIAN in North Georgia, and found to be in EXCELLENT HEALTH (this was less than 3 months ago).

THIS HF RIG IS A RELISTING!! I LOWERED THE ORIGINAL RESERVE PRICE. With the RESERVE lowered to it's current price I am now cutting the rig over $500.00 from what I paid for the rig less than 3 years ago!

ADDED BONUS!! To the HIGH BIDDER & (who meets my reserve price)I am giving FREE a cable that connects the RIG to a IBM Compatible PC. You can "Control" The IC-737 via your computer!! This WAS NOT Included in the orginal offering.

To Bid On This Item, Please Click Here!

Check it out here......no longer with any reserve....
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=449972468

MFJ-1278B Multi-Mode Data Controller

10 Modes ! with original box and books.

AMTOR, RTTY, ASCII, CW, 16 GRAYLEVEL FAX, NAVTEX,

COLOR SSTV, CONTEST MEMORY KEYER, PACKET, and

PACTOR with 32k Enhanced Mailbox. Also has Turbo with

2400 Modem.

Included is an RS-232 cable for connention to your PC's serial
port and a "radio port cable" for connection to your radio, the
manual has lots of information on hooking the 1278B to various radios.
The A.C. power cube (MFJ-1315) included, used only for a short
while on VHF packet, it's about 5 years old and spent most
of that time in storage, unit still looks like new.

Will warrenty (10 days) that unit is not DOA.

I have a Kenwood UHF TK-330 with 10 ch.,keypad,and the alpha numberic
display, with one battery. It's missing the ant. This radio works and is
in fair condition. Programed on the amateur band. I'm looking to trade
it for a Motorola VHF MT1000 16 channel with the keypad. No battery
neccessary, that can be programed for the amateur 2m band.
I may be contacted via e-mail(n2icv@home.com) or 1-877-527-1765.

If you could give me an answer or steer me in a direction, my tr-7 lost its ability to receive and transmit lsb. but if I enable the pbt I can receive lsb but still not xmit lsb. without the pbt enabled the receiver sounds like it is a narrow filter mode when it is not.I did notice that the usb receive did seem to get bassier.and I got a report that the usb signal was fuzzy on xmit. any and all help would be appreciated. These are new, Canadian Government surplus, in original packaging. The supplier's name, Richardson Electronics is on the Government label. These tubes were made in the early 90's as indicated by the date codes.

I'm asking $85US each or $175US pair, I have a total of 6 each. I will pay

the shipping in continental NA.

Take the top off the radio. In the front right corner with the front of the
radio facing you, there is a plugin board that contains all the regulators and
voltage adjustments for the entire radio. There is one pot. adjustment for the

10 vdc used throughout the radio and others for USB, LSB, CW, RTTY. If I remember correctly, there are five altogether. Be sure the 10 vdc is set correctly, first. Then adjust the others. I can't guarantee this is the problem. However, in the 20+ years I had my TR-7, once a year, I simply had to pull the board out and reseat it. One or several of the voltages did not get off the board through the connector. If the PBT works, but does not receive/xmt without the PBT, this is probably your problem. Simple to fix if that's it.

I found originally I had no voltage to the pbt board,well after some tinkering I come up with a new problem..no rcv/xmit and the counter starts counting up from 18 mhz and will not stop. I guess I will pull up my sleeves and get to work.

John,
Before you go too far, this "counting up" is nearly ALWAYS caused by poor
contact on the digital board connectors. Take the screw out of the center
of the board (big board in the front center of the chassis top with cover
off), make a couple of "hooks" out of a coat hanger or similar and pull that
board up a bit, then reseat a few times. That should fix the counting
problem. However, if you have no voltage to PBT board afterwards, that's
yet another problem.

John,

if you have modify the 10 volts, you need to realign the TR-7 (all the
procedure). See in the servive manualo.

Regards,
JM CHERRY

I have ruled out the try and unplug and plug back in mode of fixing. I understand how the power supply board works. I have all voltages from power supply board to the pbt board but no bfo output. I made an error in diagnosis I do have transmit. seems as if the synthesiser came unlocked on receive but when I go to xmit it locks. so I will chase that problem first

then go on to the bfo problem. if I don't get it I'll drop it out of the second floor than take all the filters , n.b. and accessories and sell it off. the c-line is a far better performer in my book and as long as the one here keeps working I am a happy camper.original post was meant for and to see if anyone had same problem in the 22 years these radio's have been around and help me short cut the circuit tracing and hair pulling and wife beating to find the problem. but I got a good head of hair and a tough wife so I think I'll make it. John

I have a Kenwood UHF TK-330 10 ch with keypad,and the alpha numberic
display, with one battery. It's missing the ant. This radio works and is
in fair condition. Programed on the amateur band. I'm looking to trade
it for a Motorola VHF MT1000 16 channel with the keypad. No battery
neccessary, that can be programed for the amateur 2m band.
I may be contacted via e-mail(n2icv@home.com) or 1-877-527-1765.

Besides an interesting collectible, these are useful for wind position
and speed sensors, ham antenna position reporting, and legacy industrial

uses. Can be run on 60 Hertz 12 volts AC if you lightly sense your
outputs with a PIC or whatever.

I have the H.F. module for the Yaesu FT-726R that is surplus to my needs. This module allows one to work the Russian satellites (RS-13/15) or the 15, 12 and 10 meter bands. Works perfectly! Supposed to be 10 watts but, in my rig, I measure a minimum of 10 and up to 15 watts output on the 10 meter band. This unit is rare as owners of FT-726Rs can attest: the module is not listed in the owners operating manual (but it was available!). Genuine Yaesu with cables and mounting hardware. Offers? ns1z@arrl.net

Kenwood TS-520S in good condition with copy of manual. $275 plus shipping
from southern California.

This is a nice rig, about the most popular ever made. Puts out 100 Watts on
160-80-40-20-15-10 meters. Has SSB and CW.

If interested, leave email or call me between noon and midnight Pacific time
at 818-894-2887.

73, Bob K6DDX

$250 for an old 820? That's all it is worth. Perhaps more than it is
worth. Should have sold it ten years ago.

Hello!
FOR SALE:
    I have a Yaesu FT757GX with original mike, Operating Manual, and Technical Supplement. The FT757GX is an all mode transceiver putting out 100W.
    I sent it back to Yaesu this past December to replace the battery and get a a general checkup; it's in great condition. Should make a great rig for new HF operator or as a backup or mobile unit.
    It also has continuous general coverage reception from 0.5 to 30 MHz providing good shortwave listening.
Barney

All the bells/whistles -- including 440 MHz. Great 6m radio, high
power on 2m.

Purchased new less than three months ago. Less than 10 hours operating
25% duty cycle. Traveled to Albania with me, and I don't need it since
returning. Like new with all documentation and box. I paid $960 at
Texas Towers, asking $875 including shipping continental US.

For quick response, reply to my callsign @ arrl.net.

73, de Marty

I have on ebay the complete Standard C510 dual band handheld with the matching CPB510 50/35 watt docking booster, and Standard scanning speaker mike. Wide receive and transmit. All FB in original boxes. With this rig you don't have to decide between buying a handheld or a mobile; it is both! Packed with features, easy to program. Currently only 51.00!

I'm looking for a good condition, used rotor such as the CDE-45 or Ham II, including the bottom section that allows attachment to a mast, rather than a tower. Please e-mail with what you have, condition, and your asking price, including shipping to Oregon. Thanks.

Icom IC-03AT

Includes: Radio, antenna,(2)BP-3 batteries, wall charger and copy of
manual.

$180.00 including insurance and priority shipping to your door in the lower 48.

The radio is in good to good very condition (some wear from use but
nothing more than very minor cosmetic wear) One battery holds a charge but
it is not in "new" condition by any means. I get close to a full day's use
out of it. Battery two seems to be at the end of its life but these
battery cases can be opened without destroying them and new cells replaced
for the old ones.

I'll thrown a non-icom hand mic that was included when I bought the radio, but I never used. I am selling the radio because I just got a mobile 220 that serves the purpose the HT filled before. Also, I have a copy of the manual and I thought I had the original but it isn't in its file and no where in the shack. If I find it, I'll include it (even if it's after the sale.)

I can provide a picture for interested parties.

Payment via cashier's check or postal money order. The radio will be shipped the day I get payment.

For the price police: Yes, I know that there are other newer 220Mhz radios out there. But really have you looked at the construction or what you get for your money?

email if interested

Besides an interesting collectible, these are useful for wind position
and speed sensors, ham antenna position reporting, and legacy industrial

uses.

Can be run on 60 Hertz 12 volts ac if you lightly sense your outputs
with a PIC or whatever.

Please see tutorial and details at
http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?

FOR SALE: ICOM IC-745 HF transceiver 160-10m; includes gen coverage
(0.1-29.7 MHz) receiver. Dual VFO, 16 memory, 100 + watts out per band.
9 of 10 cosmetically, 10 of 10 operationally. Requires external
12 vdc power supply (as do most rigs nowadays). Used extensively in past
2 years, mainly on ssb and psk-31 modes.

For more info, e-mail and I'll get right back to you.

I don't need 2 rigs, so I MUST sell this to help offset cost of the new
rig I just
bought. $450 OBO (REASONABLE, pse), and I will pay shipping lower 48.

Thanks and 73,
Bob

This thing looks like a shrunken version of a 30s electric iron
connector. It's a female thing. About 1" across & .5" high with rounded
narrow sides. Three ~1/8" pins in a triangular pattern.

It goes on a RCA 50-A mike. The mike that was the park anouncer's
at Atlanta's 36 yrs-deceased Ponce de Leon Crackers park.

I now have one operating trumpet (not folded) and one p-p 6L6 AB2 RCA amp &
preamp from same place.

Gonna use @ 8-00 AWA meeting. Having fella who was ball boy in '49 & '50
announce a Macon Rangers vs Atlanta Crackers inning.

Thanks,

   Marty

Lots of Canon style connectors are available from
Surplus Sales of Nebraska (www.surplussales.com)

No, I don't have anything to do with them, but I've
seen these in their catalog. Probably worth a look.

>narrow sides. Three ~1/8" pins in a triangular pattern.

   Do you have a model number? Or a number for the mating connector?
I'd have to look it up in a catalog, to see if I have one.

73, Alan

These connectors are still manufactured. Go to:

http://www.alliedelec.com/default.asp

Under "search criteria" enter "xlr" (the type of connector) and under "search scope" select "part description. Should bring up at least 20 flavors.

I threw away over 20,000 of these over the past 15 years with my company.
Can't believe they are worth anything??? Then again, ain't everything a
collector's item these days.

Mark

,rec.radio.swap,rec.ham-radio.swap

Besides an interesting collectable, there are useful for wind position
and speed sensors, ham antenna position reporting, and legacy industrial
uses. Can be run on 60 Hertz 12 volts ac if you lightly sense your
outputs with a PIC or whatever.

Please see tutorials and details at.

I have one, or I would be interested. But it would be a good idea to
tell folks .. shipping from *where*?

I'm interested in the 30L1, but I'd fly to pick it up in person...Cash!
If you are within 80-1200 miles of central Michigan.

The only way I purchase these kinds of items on the net is to see them and
pay cash in person.

I do not in any way shape of form buy though e-bay.

I have a retail, non-upgrade, full version legal copy of office 2000
premium. I would like to trade it for a nice shortwave radio.

E-mail me with what you have and I will consider all offers before
making a decision.

This is the package that contains Excel, Word, Powerpoint, Frontpage,
Access, publisher and Photodraw !

Here is a link that shows the internet price of $680 and an overview of
the program

Approximately how much tension is recommended for guy wires on a Rohn 25G
tower. Mine's 40', has two sets of guys (22 & 38'), will be loaded at
approx. 10 lbs. surface area. I'm in southwest Texas, it's pretty windy
here.

73's

Richard

Tension is applied until the lines are straight, and all lines must have
equal tension applied. 200lbs. is about right.

richard d'avy wrote:

I would avoid this unit like the plague.

If the poster can't be honest enough to post that it's "for auction"
instead of the 'for sale' how honest do you think the condition
of the equipment will be?

Mike

bieker, are these tubes good and how do you prove it? and where are
you getting them , considering they are in short supply? and oh yes,
don't tell me they test good, that really doesn't tell you much, a
mediocre tube can test good ,but it won't put out,......cd is out....

dan
Obviously you must have been burned on some tubes you purchased dirt cheap
on ebay or from a swap meet
I'm not online to rip off people.Yes I use a tubetesters and a good ones at
that.
I use hickok 539c,118b,tv7 & sencore mutual conductance tube testers.All the
testers where calibrated professionally
If you have any knowledge about tubes you that they are the best testers out
there.
Occasionly a tester can be wrong .Over the years I have found the best way
to test a tube is to put it in to a circuit but
in most situations it is not feasible.

You say tubes won't put out ?? Even a weak tube will put out to a point if a
radio or amp is properly tuned buy a qualified tech It sometimes is not as
simple as replacing a tube

Track record on sales??
check ebay under my call sign n9tew
I dont sell tubes under a allies name

Why do you say tubes are in short supply???
In 5-10 years maybe
I saw plenty of tubes at the dayton hamvention
Bob

I am looking for a B coil for a HRO. The older stlye with handles is preferred but I can use a
later type if I have to. Might by a junker HRO if it had a set of coils and was priced right.

I have lots of BA stuff to trade if you prefer, tr relays, tubes, meters, phones, mikes....

Thanks

George

George... I have an HRO60 W/ coils for sale. It is not a junker but will
require some elbow grease. It has all new tubes and is mechanically solid.
Are you interested? W5AK

This is a great scanner and general coverage radio.
It receives continuos coverage from 100 Khz to 2 Ghz (including cell

bands).
It is in need of a minor repair. The crystal needs to be resoldiered to
the circuit board.
I could do it myself. But, I am too afraid that I will ruin it.
I have software for it to work with a Mac.

I received in a trade a HW-16. I have no idea if the CW Transmitter is working or not - I have not hooked it up at all. I do have the manual to go with the transmitter. If your interested the transmitter is sold AS-IS. And buyer pays for shipping.
Price is $85.00 + Shipping. Transmitter is in excellent cosmetic condition.

Email if interested.

Have forsale a very nice looking Drake T4XC with the AC-4 power supply. the T4XC needs a new set of finals. only putting out 40-50 w's. I tried a spare set that I have and got 130 w's out of the radio. the serial number is 25646

on the T4XC and 44934 on the AC-4.I am asking $300 shipped u.p.s. in the
u.s. I have a copy of the manual for the T4XC.I also have a MS-4 speaker
that I could throw in for $50.so if you have a R4C and need to make a
complete station this is the setup for you. John w3ayt@arrl.net

Well this is all that remains and it ALL has to go, so drop me a line if the price seems out of line. I'll even through in the shipping and insurance state side if the offer is good :)

Radio Shack HTX-212 2m mobile I give it a 7 as there are some minor surface scratches on the case. $125 obo

TrippLite PR-12 power supply, mint, very nice unit. $60 obo

MFJ-407C Deluxe Electronic Keyer, mint, bought but never got around to going for the code test. $50 obo

Bencher BY-1 paddles, same story as keyer $50 obo

Cobra 2000 GTL w/ extra speaker. With original box and mic. Also has D104 deskmike. Yes it does have the extra freqs and clarifier mod. $250 obo

It's time for me to upgrade the computers in my ham shack from 486 to pentium so I'm looking for several motherboards with CPUs and optionally, memory.

This is what I'd like:

well known boards like ASUS or others.
P166 or better chip
On board I/O including FDC/HDC, Serial and parallel, USB, IR connector that is IRDA compliant.
ISA/PCI slots min of three each. (alternately, all PCI slots)
Must have the manuals for the board or be avallible on-line.

Board style may be AT or ATX.

I don't want boards with on-board video or sound cards. SCSI controllers are ok, as is on-board ethernet.

Also, I would consider purchasing other components such as hard drives, video and sound cards, and memory on an individual basis.

I would prefer to pay cash for such items but do have some items to trade. Mostly, they are components- trimmer caps, twinax-coax, misc other items.

Please e-mail me with the manufacturer and the model number of the board, the CPU manufacturer, model and speed. Include an asking price.

e-mail ghopper@eskimo.com

Grant

Selling price survey for Tektronix instruments on eBay has been updated to April 30/2000 and is available on my web site.

The url is : http://www.vaxxine.com/phil/scopes/test.htm

Separate pages are there for scopes, plug-ins, probes, miscellaneous Tek instruments, and a page of vintage HP, GR and Wavetek stuff.

Get ready for Dayton.

Phil (VA3UX)

Hello, I'm Butch Magee KF5DE and I have a new non-ham +/- five volt power supply rated at 30 amps. It is designed for rack mounting and I'm guessing this peice was designed for cel phone or pagers or some other communications gear. Where should I put this on ebay and how much reserve to ask for it? Thank you for your time considerations on this.

73, Butch

Sellers seem to list that type of gear in (Consumer Electronics ->
Radio, Ham -> General) or (Consumer Electronics -> Radio Equipment ->
General). If you can't decide between those two categories you could
always put it in (Consumer Electronics -> Test Equipment -> General),
which has a popular following. I usually surf that one at least once
or twice a week, myself.

I'm not a fan of reserve auctions. Unless you simply don't want to sell
it for less than top dollar, I'd list it with a low minimum bid, no
reserve, and let the market do its thing. Either way, you should study
the completed auctions for the search term "power supply" to see what
similar items have been going for.

I have one of these amps and love it except for one item.

I bought it with the intention of using it as a very portable (back packable) substitute for a mobile radio. I had intended to mount a half wave whip to the output connector of the amp. It turns out that the strong RF field generated by mounting the antenna in that manor drives the internal electronics nuts. Remote mounting the antenna a short distance away eliminates the condition.

In retrospect using the amp in that fashion isn't a real good idea anyway as the intense RF field doesn't do the operator much good either. :-]

If you could use this type of amp (the radio connects to the amp via a slide on adapter, and it also serves the 12 volt needs of the radio) it's a good amp, and the price is also attractive.

Louis

I am looking for a low band radio that will cover 31 mhz, prefer Maxtrac
or Radius or MLS, etc.

I have 7 sections of Rohn 25 G Tower for sale (approx 66 ft) in excellent condition, on the ground. This includes the "pointed top section, which has no bushing so it can take up to a 2 inch mast. Also included is the rotor plate, and a nice side arm for mounting an additional antenna onto the side of the tower. No bolts or other hardware included. All or none, I can't part or section it out so it's all gotta go at once. First $250 or best offer gets it. I am in Del Rio, Texas, 150 miles west of San Antonio, 150 miles south of San Angelo, this is the pick up price, I can deliver in the area (outside Del Rio) for a nominal fee.

For Sale: Antenna Specialists Model ASPB1654, 5dB gain, UHF (470-494MHz) magnet
mount
mobile antenna with 15 feet of nice RG-58/U coax and PL-259 connector (will do Ham
with minor
deg.). Rated at 150 Watts. Packaged brand-new in sealed box. Very high quality
antenna
featuring their patented "Dura-Flex" spring mount and strong circular magnetic
base. Mount
can accept either SO-239/PL-259 (UHF) style antennas or NMO (Motorola) style
antennas with
supplied adapter. Asking $25 plus shipping. Thanks!

Hello All,

Visit my page for items for sale. Will be listing the items in the next 7-10 days on E-Bay. I'm building the list and will be adding photos in the next couple of days. You can view the page at: http://www.jones-clan.com/EBay/

Cleaning out the shack and do so spring cleaning. I will consider any serious bids - if I recieved none, will list it on E-Bay. Will use the funds to upgrade the shack and help out with out ATV Repeater with the school club.

Happy Viewing.

73
Walt - KC7HEX

Circa 1931 National TRF SW Series Shortwave Receiver on eBay.
There is no model no. Could be a SW4 but I am not real familiar with
National radios.

Content-Transfer-Encoding: 7bit

This Lot consists of the following slugs: 1. 25-60 MHz 25W (NEW), 2.
50-125 MHz 50W (USED), 3. 100-250
MHz 50W (NEW), & 4. 200-500 MHz 50W (USED). One of the new slugs has the
letters smeared but I assure
you it is new. The two used slugs are in like new condition. These slugs
come with a money back guarantee less
S&H if you are not satisfied with them. I am asking $175 for all four.
This is about half of what I have in them.
These slugs generally run from $80 to $100 new. Buyer pays $4.50 S&H to
anywhere in Continental U.S. and Canada. Shipping will be via 2-3 Day
Priority Mail. Other methods can be arranged if requested. Payment must
be in the form of a money order or certified/cashier's check.
Please email if you are interested or have any questions.
Thanks in advance!!!

James

Hello,

  I have Discone antennas up on a eBay Dutch auction for $29.95. These are not only great wide-band receive antennas, but are good for Transmitting in the Amateur 144, 220, 440, 900, and 1290 MHz. bands with a SWR of 1.5 to 1 or less.

The Auction ends 4/16 9:52 pm cst.

They're at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=305204189

This is a Dutch auction, which means no worries about being outbid at the last moment, or the price sky rocketing because of bidding wars. You bid, you get one!

Be sure to check our other auctions and website for other great deals on Amateur, Scanner, and CB antennas.

Thank you

Hello,

  I have Dual Band Collinear Base antennas up on a eBay Dutch Auction for $59.95. These are 8' fiberglass antennas comparable to the Diamond X200a. They have 6db gain on 2 meters and 8 db on 70cm.

The Auction ends 4/16 10:24 pm cst.

You can see them at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=305251302

This is a Dutch auction, which means no worries about being outbid at the last moment, or the price sky rocketing because of bidding wars. You bid you get one!

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in good condition
as removed from military service.

This is a military/commercial quality amplifier that uses a single 4CX3000A to produce
3 KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10 seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

 The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $3,000. unpacked.

I have a few NEW Guaranteed 4CX3000A tubes at $1,000. each

Crating by a professional packer is $350.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site
http://www.columbiaelectronics.com

If you need more info please contact me.

I purchased a CD-ROM covering all 9 volumes of Police Call, 1999 1st
edition from Grove Electronics in Feb. 2000 for $34.95 US.

I cannot get the CD to install properly and have had virtually NO
support from "Pozilla Software" who is the writer of this data base.

I have made countless calls from Feb. to present with unreturned calls.

So much for their help line and customer care. It is none existent.

Think twice before you throw your money away on this product.

So far it sits gathering dust, totally useless to me. It does NOT
function!

Pozilla Software has a great "I don't care about the customer" attitude.

Instead of using this as a forum to blast Pozilla, why not try and be a bit more construtive? Personally, I realize this is a relatively immature (in other words "new") product and I would expect a few bugs. (Anyone remember products such as Windows 3.0, WordPerfect 6.0, etc.)

Try to explain the problem you are having with the product and see if someone here may be able to help out. Otherwise, quit griping and enjoy your new paperweight.

April 16

I just received the following from Melissa Goldman, wife of Adam Goldman, President of Pozilla Software:

Adam wanted me to send you an e-mail. He was hospitalized last Monday with a collapsed lung and the office has been temporarily closed. While the doctors have released him from the hospital, he has been ordered to bed rest for a couple of weeks. In the interim, the office is closed. If you could release a statement that the office is closed and why it is closed, that would be very appreciated. Please let people know that e-mail will be answered at least once a day until his health improves. I am doing the best I can to keep things running like now, but since I do not have the extensive knowledge of scanners and the software that my husband has, I am very limited on what I can reply to. Please assure everyone that Pozilla is still around and we will do our best to facilitate our customers.

I'm sure I speak for all of us in the scanner community when I offer our heartfelt wishes for a fast recovery, Adam! Take care of yourself and we'll be here, waiting patiently, when the time comes for you to climb back in the saddle!

Congratulations to Tony Gargano for taking delivery of a Japanese version of the Icom IC-R3! Perhaps he will be kind enough to share his thoughts on the radio with us over the next, few days. That is if he can pick up on the manual written in Japanese! ;-)

And yes, today was the day that Strong Signals reached the 1,000,000 hit mark! I want to thank all of you who have helped make this THE place to be on the Internet when it comes to radio monitoring! We have all done a lot to help each other where we can, and I think the results speak for themself. Thanks for all your support, and long live the monitoring hobby!

Call your credit card company and have them remove the charge and get your money back for you. The merchants are bound for 6 months after a sale by contract that the credit card issuer can take back thier money right out of the merchants bank account.

Since you can't get any use out of the disk, your liability for paying for the merchandice would theoreticly be the value of the plastic and the cardboard of the disk and box.

Stick it to them, and get your money back the hard way, and thenlet them
all go pound sand!

I have a Kenwood 22AT for sale. I have all the boxes for the radio/charger.
The Extended TX/RX mods have been done and radio has the 5 watt battery on
it. The price is 180.00 plus shipping. I need to sell ASAP.... baby on the
way and wife has lost her job.

I am looking for dead NCL 2000 amps and parts, especially a cabinet, to
finish my amp project.

I need a manual for a new Cubic R3030 rig I bought. Will pay your price.
Or can copy some kind souls original and will pay for it.
Much appreciated.

Yaesu FT-5100 VHF/UHF Mobile

Excellent dual band rig. Original owner. Condition 8 of 10 (band switch lettering is rubbing off, some slight scuff marks on top). High power (50w on 146 MHz, 35w on 440 MHz). 80+ memory channels in two banks per band. Full crossband repeat capability. Dual in-band receive (V, U), Built in duplexer. Box, manual, TT microphone.

AES and HRO price used at $350, aade lists ebay prices at average of $290, high of $350, AF4K lists one transaction at $400. I'm asking $275 plus shipping.

Very late production model s/n (001xxxx), mfg. Jan 1988. Two brand new Inrad CW filters (400Hz) one for each IF stage ($250 value). IF-10B computer interface installed and W1GEE computer interface cable included ($125 value). Built-in antenna tuner option installed. Excellent condition (9 of 10), original manual. Reason for sale: already have two other HF rigs, this one takes up more space than I can allow (but is by far the best performing rig I own!)

US$1,100 plus shipping.

Email to <my callsign> at arrl.net or <my callsign> @ midsouth.rr.com for quicker response.

Delivery within 250 miles of Memphis, Tennessee, can be arranged.

Thanks,
Marty N5NW

I have forsale a Drake TR-4 with the 34pnb noise blanker.front panel looks

like a tr-4c with the n.b. switch,also have the RV-4 remote vfo and the AC-4 power supply.this is a very nice looking station with some small scratches on cases.radio works well 80-10 meters with 150w's output.I also have the original manual for the TR-4/34pnb.I am asking $350 picked up in Phila.
 shipping would probably be about $40 u.p.s. John w3ayt@arrl.net

I have forsale a complete Drake station consisting of a T4X,R4A,MS4 & AC4 power supply.I also have the original manuals and inter-connect cables.this is a nice looking station all but for some cutouts on the bottom cases near rear where the previous owner had rca and bnc jacks so he could run inverters and transverters. I have since removed and restored to original electrical condition. I have also removed front panels ,knobs and cleaned the vfo dials.they do look nice. I am asking $350 picked up in Phila. also when radios are next to each other on table you cannot see the cutouts,I do understand Drake still has bottom cases available. John w3ayt@arrl.net
also, I may but shipping would probably run about $50 u.p.s.

US Tower MA-40 tubular crank-up tower.

Max height 40'
Min height 21'6"
2 sections
242 pounds
10 sq. ft @ 50 mph

This tower is on the ground and ready for pick-up only by purchaser.
Location in north Renton, Washington near exit 7 on I-405. This tower comes
with house bracket clamp but base bracket is still in ground but might be
coaxed out of concrete with some effort. We noticed that when we lowered
tower the base pad was loose on sandy soil. This tower is part on an estate
sale. Please e-mail me if you would like to see pictures.

$400.00 or best offer.

Hi,

could anyone help me please in getting the valves for a WW-II BC 375 set:

I need
4 valves of type VT 4-C (also known as type 211), and
1 valve of type VT 25   (also known as type 210).

The VT 4-C is a triode (10 volts at 3,75 A, resp. 1250 volts), the VT 25
is also a triode, used as microphone amplifier.

Please send your info to
Peter Dufour in The Netherlands
hunk73@hotmail.com

Many thanks!

I have forsale a complete Drake station consisting of a T4X,R4A,MS4 & AC4 power supply.I also have the original manuals and inter-connect cables.this is a nice looking station all but for some cutouts on the bottom cases near rear where the previous owner had rca and bnc jacks so he could run inverters and transverters. I have since removed and restored to original electrical condition. I have also removed front panels ,knobs and cleaned the vfo dials.they do look nice. I am asking $350 picked up in Phila. also when radios are next to each other on table you cannot see the cutouts,I do understand Drake still has bottom cases available. John w3ayt@arrl.net
also, I may ship if I don't get a local buyer but would probably run about $40 u.p.s.

I am in need of the following xtals;

Collins crystals:
6.755.0   3.6-3.8 mhz
15.577.5   28.0-28.2 mhz
15.677.5   28.2-28.4 mhz
15.777.5   28.4-28.6 mhz

if you could help it would be appreciated,hope to get this 32S-1 restored.

Cobra 2000 GTL
Excellent condition, original box & packing, mic, external speaker, extra D104 stand mic. Extra channels added by local pro along with higher output power supply transister for increased RF power output and clarifier mod. All done professionally. Beautiful radio but hey gotta build that down payment for the homestead :) Will ship 50 states insured UPS at no extra charge. $325

Radio Shack HTX-212
2M mobile unit used as base unit. Great condition $125

Yaesu FT2500M
2M mobile unit w/ CTCSS board. Excellant condition, with orginal box, manual etc. $200

TrippLite PR-12
12A 12V power supply used to power the HTX. Mint condition. Very clean power output. $60

Cushcraft AR2 Ringo
2M base antenna, great for attics and other small areas only 4ft tall. Mint condition. $35

Diamond SG7500NMO
2M/70cm dual-band mobile antenna with HD magnet mount. $60

2) 30ft sections of 9913F coax, was used indoors only. $15 each

MFJ-407C
Deluxe Electronic Keyer, Mint condition. Only used to practice code for about 6 hours total. $50

Bencher BY1
Iambic keyer paddle w/ black base. Only used with 407 to practice code. $65

Yahoo email is so my main mail won't get spammed to death. Email me at yahoo and I'll provide my normal email.

Thanks
Van

radio.marketplace,rec.ham-radio.swap

$650 plus shipping from 71201. Weight 20 pounds

Icom IC-751A HF All Band Transceiver
Serial Number: 39xx

-160 thru 10 meter HF transceiver
-General coverage receiver from 100kHz to 30MHz
-All mode: SSB, FM, AM, CW, & RTTY
-Continuous Duty Operation at 100 watts RF output
-32 tunable memories
-Receiver range: 105dB
-Electronic keyer, semi or full break-in rated to 40 WPM

-Volume control-tracking sidetone
-RF speech processor and tone control to produce sparkling clear audio
-RF power control independent of microphone gain, ALC, and speech
processor

Also includes:
Icom SM-6 desk microphone
Icom original Instruction Manual
Icom original Service Manual

Installed Filters
9 MHz IF
- FL32A (CW/RTTY, 500Hz)
- FL80   (SSB, 2.6kHz)

455kHz IF
- FL44A (SSB, 2.3kHz)

Other Accessories Available (will not be sold before transceiver)

Icom IC-PS30 -- External AC power supply with volt/amp meter, 13.8vDC,
25 Amps. Matches IC-751A in design and color. I will need a power
supply for my new transceiver, so I would prefer to trade for
comparable power supply, such as Astron RS35M.
$100 with transceiver, $125 if separate. Buyer pays shipping via UPS
Ground.

Icom UX-14 -- CI-IV/CI-V Converter for computer control of transceiver
(requires Icom CT-17). A rare item, if you don't know what it is,
chances are you don't need it or wouldn't use it if you had it.

Johnson Invader 2000 Transmitter -Rare!

E.F. Johnson Invader 2000 transmitter. Note that this is the "2000" model, the high power version, not the more common low power unit.

Condition is good. Front panel is near perfect, but cabinet needs an over spray. Unit is complete except for the connection cable. All tubes on the RF deck have been removed for cleaning and shipping. Tubes will be properly packed and shipped along with the transmitter. Output is CW, SSB and AM! Would make a super addition to that boatanchor collection.

Includes a copy of the manual. The unit is complete and would make a super simple restoration, or parts rig. I have checked the plate transformer and it is working just fine. But with out the cable I am not able to power the unit up. The cable is a simple affair with a male and female plug, seven pin if I recall correctly, which can be readily found at hamfests, or purchased from a parts supplier. I purchased the unit a few months back for a winter restoration project, but at this point I just do not have the time available. Aside from the cosmetic issues mentioned earlier, the unit looks to be in very good condition for its age.

Buyer will be responsible for pickup or shipping costs from Buffalo, NY. Can also deliver to local hamfests in Western New York region. Thanks!

Knight TR-106 6 Meter Transceiver -Like New! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293616374

Knight TR-106 6 meter Transceiver in like new condition. I have never seen a cleaner TR106, Absolutely perfect in cosmetic and electrical condition! Comes Complete with Original Operators Manual, Construction/Service Manual, and large Schematic. Also includes the Knight Noise Canceling Microphone. Amplitude Modulation (AM) via plate and screen. Can be either VFO, or Crystal controlled (3 sockets) for TX operation. Receiver uses built in VFO for wide range tuning from 50 to 52 MC. A single 2E26 final offers 15 watts of RF input.

Output network with match a wide range of antennas from 30 to 90 ohms. Can be powered from 120VAC with included power cable, or 12VDC.

A very unique and mint transceiver for the Knight or Boatanchor collector. I have tested the unit personally on my bench and find it works just great!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

Heathkit DX-60B Transmitter -Mint! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293635395

Here is one of the nicest DX-60B transmitters that I have ever owned! Paintwork and front panel is perfect. I have tested the unit personally on my bench and find it works just great! Offers 90 watts of CW and AM input into a single 6146 final tube. Covers 80,40, 20, 15 and 10-meter bands. Clean units like this one are getting harder and harder to find, it even has the original Heathkit knobs, now that's a change! Has an internal holder for up to 4 crystals or VFO input .Pi output circuit offers wide matching of a variety of antenna impedances.

Comes with a copy of the Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included seveal hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

Heathkit HW-16 CW Transceiver -Very Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293658940

Great moderate power CW rig for home or portable/field use. Runs off 120VAC, but its small size and lightweight make it a nice travel or vacation rig. RF output is 50 to 90 watts, adjustable from the 6GE5 final tube. Grid block keying with automatic antenna switching and receiver muting. Frequency coverage 3.5 to 3.75MHz, 7.0 to 7.25MHz and 21.0 to 21.25 MHz. Uses either Crystals or VFO drive.

In really nice condition, a solid 8.5 out of a scale of 1-10. Has not been hacked up for modified in any way. I have serviced and inspected the rig, replacing the weak tubes, and some resistors that had changed in value. Works like new now!

Comes with the Original Operations and Assembly Manual.

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

I have included several hi-res photos of the top, front and manuals of the unit, please wait for them to load

Thanks!

National 183 Receiver -Classic and Nice Too! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293688875

Here is a classic boatanchor receiver, the National 183. These are getting tougher and tougher to find. This one is in very good condition for its age. Works and sounds just super! Coverage from .54 to 31 MC and 48-56 MC Coverage as well! Calibrated band spread for the Amateur bands of 6, 10-11, 20, 40 and 80 meters. Receives both AM and CW with the built-in BFO, can also detect SSB with proper tuning.

Double diode noise limiter and 6 stage Crystal filter work great in noisy and crowded band conditions. The Push-Pull audio, using a pair of 6V6 tubes offers that classic boatanchor sound, with plenty of audio.

I have checked this unit on my bench and I am very happy with it. It does need some very minor cleanup, but would look and work great in any shack right now.

Comes with a great copy of the original manual, complete with service info

and schematic!

Buyer to pay for unit in money order or cert. funds within 7 days of end of auction. Buyer will be responsible for shipping from Buffalo, NY 14051 zip code.

Please wait for the hi-res images to load.

Thank you!

National NC-183TS 10" PM Speaker -very
Nice! ->http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=293711557

Here is the matching permanent magnet loudspeaker to the National NC-183, NC-183D, NC-183R receiver series. Cabinet and speaker are in very good condition. Sounds just super, especially with the 6V6 Push-Pull Audio Output in the 183 series.

These speakers are hard to come by, especially in condition such as this, so don't miss it!

Buyer to pay in certified funds within 7 days of the close of auction. Buyer will be responsible for shipping costs from Buffalo, NY 14051 zip code.

Thanks!

Mini-products HQ-1 Hybrid quad for 6-10-15-20M. Very good condition, coils good, aluminum clean, and most important has complete set of tuning "spikes". Very compact antenna, and can be turned with a TV rotator. With full set of assembly/tuning instructions. Also have RS rotator, control and

cable - excellent condition, and quite capable of turning the mini-quad.

Antenna alone: $150 plus shipping.
Antenna w/rotator: $200 including shipping (within continental US only).

One of the finest high frequency analog scopes of all time.
Very clean unit includes probes, cover, and pouch.
It has seen very little use.

Please see

If it is for auction on E-Bay 'PLEASE' state so in the Subject i.e.:
FA. Do NOT put in FS: since the equipment is "NOT" for sale but
auction. Most on here don't want to see things that are for action
since E-Bay is a BIG rip-off.

VLF - HF Watkins Johnson receiver, in a portable rack mount case (new),
with an M-7000 data decoder,
and a light / power bar.

Very cool system.

Ready for Field Day, emergencies, or just plain fun.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=289895051

Eleven very high quality pictures.
Thank you for looking.

Kevin

Hi -
 I awhile back purchased a Butternut HF6VX.
It is a Ham /Amateur Radio Antenna (Vertical) that covers 10 - 80 meter
and is 26 feet tall.

I built it about half way and never put it up or finnished it.
I have all the parts, box and instructions.
Look here for more info:

http://www.bencher.com/hf6vx.html

It sells at Ham Radio Outlet for $319.00

I would like to put this up for bid.

The best offer over $100.00.

I might ship if the price is right.
Please reply to rich@wanfear.com and NOT this email address.

Does anyone have any experience with this antenna? I wonder if the problems
experienced by R-7000 owners with water getting into the traps also occur
with the R-6000. I've heard that the SWR skyrockets on certain bands on some

R-7000s when it rains. Any insights would be appreciated. Thanks.

I've used the R6000 for a little less than 1 year. I have no problems with trap arcing etc even when running 1KW (AMP Supply 450 ZC).

However the bandwidth on 20 changes when it rains. It is still resonant at 14.20 but the VSWR at either end goes up to about 2.2 to 1 from 1.5 to 1.

The other bands do NOT exhibit this special "feature".

Deacon Dave, W1MCE

I have for sale a complete matching Yaesu FT-107M station. This is one of
the classiest-looking stations of all time, with the matching white-faced
equipment, yellow LED readout and pale green meter lamps.

The station consists of:

Yaesu FT-107M, with WARC bands, internal AC supply, 500 HZ CW filter
FC-107 matching external antenna tuner / antenna switch
FV-107 matching external VFO
SP-107 matching external speaker
SP-107P matching external speaker and phone patch
FTV-107 matching external transverter with 2 meter and 440 mhz modules

I also have a Henry 2-KD5 and Heathkit SA 2040 antenna tuner on the same
page.

For details and pricing, look here...
http://people.ne.mediaone.net/cmacpherson/index.html

I'd like to sell the entire station (with the possible exception of the Henry linear amp and Heathkit antenna tuner), and preference will be given to those who offer to buy the complete station. That means that I might not accept your offer for a component right away, even above the asking price.

Sorry about that, but I don't want to get stuck with any of the accessories, especially after the radio is gone.

Novices have VOICE priviledges on 222-225 and 1.2 Ghz.
as well as all other modes authorized there.

YOU ARE FULL OF IT!!! MOST OF US who DID file against 87-14 WERE
GENERALs,
Advanced and Extras (I myself am an Advanced and operate 95% VHF-UHF)..
Get your damn facts straight before speading such crap..

Chris
WB5ITT
In fact I own MORE gear for 220 than any other band!

Back in the 60s, this was true...In fact, the Novice and Technician
class license could be held at the same time. (Which was interesting;
had a friend who was WN5xyz and WA5xyz at the same time! Dont recall

his actual call but you get the idea!) But then the Techs of those days
STOPPED at 50.0000 MHz.. and the techs did NOT have full 2mtr
band priviledges until the early 70s!
